### Youngest College Student

(Walla Walla Bulletin.)

Gail M. Williams, a freshman at Whitman, is perhaps the youngest student in the state to be admitted to first year college standing this fall. Williams is fourteen and weighs 90 pounds.

He is the son of Mr. and Mrs. J. H. Williams of Weston, Oregon and was among the eight men entries who were exempted from freshman English because of unusual ability. He is a graduate of the Weston high school, having finished the course in three years with three units to spare, and received a one year scholarship to Whitman because of his excellent standing.

Born at Coeur d'Alene, Idaho, he is an outdoor boy, playing tennis and baseball. In high school he played left field and short stop on his school team during his last year there. He was president of the senior class and of the athletic board as well as an officer of the student council.

Hardly five feet in height with broad shoulders and a well-shaped head covered with dark, curly hair, he presents a strange sight on the campus among the older students.

Riding on the backs of the different frosh relay runners in the freshman-sophomore scrap, Williams proved the hero of the event. With 125 pounds to carry, the soph labored far in the rear while the frosh galloped in with the bacon over a half lap ahead.

In every other event of the scrap young Williams did his part, even to being pulled through the icy depths of "Lackum Duckum."

He plans to graduate from the law school at either Stanford or California and then complete his training with a two-year post graduate course at Harvard.

With eighteen hours on his schedule, Williams is carrying more than the average freshman is allowed to take. His courses are Biblical literature, public speaking, Cicero, European history from 1870 to 1914, and mathematical analysis.

He is a reserved little man and shows not the slightest tendency of being spoiled from too much attention. If he can keep his head under the strain of favorable comment he will prove a real man as well as a worthy exception.
