Another was a tape worm 87 feet in length, consisting of 9,600 joints, Among medical men there exists no little difference of opinion relative to the origin of these entozoa. One class of writers believe that these parasites, at least many of them, originate in the endowment of animal molecules with vitality from the parent body. favored by certain states of the v tal forces of that body; the states originating their organization and promoting their growth within one thousand miles of San Francisco and propagation. That all descriptions of e dozoa are met with far more frequently where animal food is used in greatest abundance, is an indisputable fact, especially where the food is the flesh of the "unclean beasts," which the Jews and Mohammedans are forbidden to par ake of. But our intention is not to w. ite a thesis up in this subject; we only desire to chronicle the fact that Dr J. W. Van Den Bergh has found a medicine a simple vegetable which grows in abund ance in Californ a, which is a dead shot to al lemozoa, of whatever de cription, generally accomplishing its object in from an hour

and a half to six hours .- Morning Call. Had we the space here, hundreds of testimonials could be produced, testifying to the trath of the asser ions that have here been made, but it would be useless and would only eccupy the reader's time.
