The Attitude of Five Great States.

The political horizon looks gloomy for Grant's re-election. Judging from wellfounded data five of the great States will be arrayed against him. Without one-half the election is hopeless. The massmeeting in New York on the 12th of April was one of the largest and most enthusiastic ever held in that city; and the arraignment of Gen. Grant's administration by Senators Trumbull and Schurz has been circulated in every village of the Union by the Democratic and Liberal Republican press. The Empire State is as sure for the Democratic nominee in 1872 as she was in 1868. In Pennsylvania the nomination of Gen. Hartrauft for Governor has been characterized by the Republican papers as "the foulest trick in politics." In Philadelphia If thou indeed wilt be what scholars a committee selected in opposition to Grant indersed this nomination and sold out the party that created it. This attempt to disarm the reform movement in Pennsylvania will only widen the breach existing there between the wings of the Republican party.

The Keystone State casting 28 electorial votes in the next Presidential contest, only gave in the gubernatorial election of 1869 a Republican majority of 4,596 for John W. Geary, the present Chief Magistrate. In the election for her Executive, which will take place in October of the present year, the State will give a Democratic majority beyond a doubt. We think we are justified in this prediction, by the wide-spread dissatisfaction which the nomination of Gen. Hartrauft has caused, and it will be accomplished as a rebuke to the administration of Gen. Grant, which has interfered so often and so injudiciously in the local politics of Pennsylvania. It will also be the prelude to his own defeat in that State; for the jobbery of the Secretary of the Navy, for the benefit of his favorites, by which the have amassed enormous fortunes, has disgusted the yeomanry of that great commonwealth. The vote of Pennsylvania, in the Presidential election, may reach 680,000. It will be a difficult task for the par- Cason, F. C., estate-N i of tisans of Gen. Grant to overcome the arguments addressed to the people of that State by men in whom they have confidence. The eloquence of Trumbull and Schurz, which will soon be heard in the Keystone State, denouncing the Chapman, Wiley-Thes E 1 of extravagace and usurpations of power, which have marked the course of the present Administra-

carry the State against him. Ohio is the next great State in which disaffection is wide-spread, and in its metropolis will be held the great Convention on whose wise action depends the political future of the Union. Judging from the preparations making for the reception of delegates from all portions of the country it will exceed in number and ability any assemblage that has convened since the formation of our Government, In the contest for Governor, in Eckles, J. D.—The following 1871, the Democrats were defeated by a majority of 16,084, which would have been considerably reduced had more active efforts been made on their part in canvassing the State. The signs of the important change going on in Ohio have been usmistakably manifested by the election recently held in Cincinnati, in which the Democrats carried the city by nearly two thousand majority overcoming the vote against them in the gubernatorial election of 1871 by 1,690.

THE CAUSE OF A GREAT MANY DIS-L eases, that have been pronounced incur able by the most eminent physicians, for the very reason that they overlooked the cause, and as Dr. Van Den Bergh has made the Entozoa a life long Study, he would inform the sick generally that by close observation and great experiments, has come to the conclusion that there are more acute and chronic diseases caused by Worms, Hydatids, Au imalculæ, or other species of Entozoa. The public generally, or the profession at large, are not aware of the number of Patients who are treated by eminent Physicians, for this, that, or such a complaint, without any relief. If the disease had been understood a few doses of Dr. V's. Sovereign Worm Remedy would have immediately cured the complaint and saved a great many lives.

INHABITANTS OF THE HU MAN BODY!

What think you reader, of your body being a planet inhabited by living races, as we inhabit the earth? Whatever may be cour thoughts on the subject, it is even so. Your body may be but a home for parasites that crawl over the surface, burrow beneath the skin, nestle in its entrails, and riot and propagate their kind in every corner of its

And who is more competent than he one that has made Worms a speciality Tentas.—Yesterday, Dr. J. W. Van Den Be gli exhibited to us a number of parasites which had been removed from persons af flicted; there were several different species one of which appears to be entirely unknown to the n edical profession. This new taenia is shaped something like an orange seed but perfectly flat, or rather like a cheumber seed, with a tail about a quarter of an inch in length. Another was a tape worm 87 fe t in Longth, co sisting of 9,600 joints, Among medical men there exis s no little ifference of a union relative to the origin these entoz a. One class of writers beeve that these parasites, at least many of hem, originate in the endowment of animal nelecules with sutality from the parent body favored by cer air states of the vital forces if that body; the states originating their regardzation and promoting their growth and propagation. That all descriptions of satozoa are met with far more frequently where animal food is used in greatest abund ance, is an indisputable fact, especially where the food is the flesh of the "unclean beasts," which the Jews and Mohammedans | Private Medical & Surgical Institute. are torbidden to partake of.
