#### Thanksgiving.

A PROCLAMATION BY THE GOVERNOR.

In grateful acknowledgement of the uncounted blessings of Providence in our bountiful harvests, continued health, and general peace; and in re-cognition of the notable fact that while during the past year many of our sistor States have been sufferers from pes tilence and ficancial distresses, while we have been wouchsafed the full enjoyment of more than usual prosperity and exemption from disease ; and while devastations by fire have visited our chief city, and several other localities within our boders, they have served to exhibit such recuperative power in our people as to turn seeming disasters into good fortune.

Now, thegefore, I, L. F. Grover, day of Thanks giving to Almighty God, the Great Giver of all good and perfect gifts, for the mercies and blessings of the year now crawing to a close. In witness whe cof I have hereunto set my hand and caused the seal of the State of Oreg in to be affixed at the Executive office, in the city of Salem,

this 1st day of November, A.D. 1873. [L.S.] L.F. GROVER. By the Governor:

# S, F. CHADWICK, Sec'y of State.

OswEGO, -- Considerable disturbance was created at the usually quict village of Oswego last Monday. As we are informedf the treable commenced by the tailure of a contractor named Wilson. The hands which had been to work for him believed that he was acting dishonestly with them, and endeavoring to defraud then out of their just dues. They attempted to get him, and threatened to visit summary punishment upon him, but he secreted himself and imally made his escape. It is general-ly believed that this Wilson had the money to pay his hands and that he acted the rased. All his property has been attached by the creditors and quiet is restored.

## LIVER AND BLOOD DISEASES.

BY R. V. PIERCE, M. D. A healthy liver secretes each day about wo and a half pounds of bile, which con-

tains a great amount of waste material. taken from the blood. When the liver beomes torpid or congested, it fails to elim-nate this yast amount of noxious substance, which therefore, remains to poison the blood, and be conveyed to every part of system. What must be the condition he blood when it is receiving and retaining each day two and a half pounds of polson? Nature tries to work off this poison through other channels and organsthe kidneys, lungs, skin, etc., but these or-gans become overtaxed in performing this labor in addition to their natural func-tions, and cannot long withstand the pressure, but becomes variously diseased The brain, which is the great electrical enter of all vitality, is unduly stimulated by the unhealthy blood which passes to it iron the heart, and it folls to perform its office healthially. Hence the symptoms of b is poisoning, which are duliness, head-ache, incapacity to keep the mind on any subject, impairment of memory, dizzy

sleepy or nervous feelings, gloomy forbod-ings, and irratability of temper. The blood itself being diseased, as it forms the sweat upon the surface of the skin, it is so irritating and poisonous that it produces discol-ored brown spots, pimples, blotches, and other cruptions, sores, boils, carbuncles and scrotulous tumors. The stomach bowels and other organs cannot escape becom ing affected, sooner or later, and we have as the result, costiveness, piles, dropsy dyspepsia, duarrhoca. Other symptoms are common, as bitter or bad taste in the mouth, internal heat, painitation, tensing tion in throat, bloating of stomach, pain in sides or about shoulders or back, coldness of extremities, etc., etc. Unly a few of the above symptoms are likely to be present in any Proser, deceased, and Estate of Mary Proser, deceased, and Sides or about shoulders of back, coldness with the proper vouchers, within six months from the date of this notice, to me cough, unsteady appetite, choking sensain any case at one time.
