therefore, is a period of the year when the inhabitants of such districts should prepare their system to meet the unwholesome condition of the atmosphere, by a course of tonic and alterative treatment. Foremost among the invigorants, recommended by time and experience, as a means of fertifying the system against all endemic and epidemic maladies, stands Hostetter's Stomach Bitters. Whoever have traveled in the West or South knows full well the esteem in which this incomparable preventive and restorative is held throughout those regions. It is literally a domestic staple in the swampy and meph-itic localities which lie on the borders of many of our large rivers and in the neigh-borhood of our Southern bayous and la-goons.
