OREGON CITY, THURSDAY, APRIL 6, 1877.

Promises to and from the South.

We are glad to learn from Southern sources that Southern opinion approves of the temperate sentiments of the President's address, and endorses his conciliatory policy.

Against the opposition of the Southern States, at a great cost and sacrifice, and at the peril of our national life, we have lifted the curse of slavery from the country, but we have not paid the penalty.

But we have now waited twelve years since the war for one promise from a Southern mouth announcing that the citizenship of the negro would be respected, and we have not heard it.

This is not the state of affairs which exists in Oregon and Connecticut. In these States no man dreads proscription or persecution for opinion's sake; in these every citizen, no matter what his color, is absolutely secure in the enjoyment of every civil or political right.

The "Past Supreme Chiefs" and other dignitaries of the "Camp of the Order of Caucasians" in California, may protest to their hearts content, and wash their hands of all complicity in the Chicó massacre.

A few hundred men ought to be sent to interview the Apaches in Arizona. Nothing short of a spirited dialogue with a regiment of cavalry can calm their eager hankering for scalps.

Hill, "Adios!"

In Mr. Lair Hill's retirement from editorial control of the Oregonian, journalism in this State has lost its most polished representative.

Mr. Hill was a clear and forcible writer; simple without affectation, and when nettled was as trenchant as a rapier. The sophisticated scribe, who delights in cheap finery, will look in vain through his editorials for anything savoring of the "hifalutin."

Had a man of his ability proved true to his party, pursuing no false goal, stopping in the race to pick up the seductive golden apples dropped by a political Atlanta his paper would have sprung to the lead editorially as it has telegraphically, and we little fellows would gladly have huddled in its wake.

Many people have laughed at "Old Probs" and "Young Indications," and the jokes shot into this weather family; but the services of the Bureau which gives us the grading of the thermometer, the ups and downs of the wind, and the perturbations of the clouds, are invaluable.

To Our Capitalists. Philosophers say that when bays have reached their lowest ebb, the tide begins to flow, and that the darkest hour is that immediately preceding daylight.

A short sketch of the life and character of the Master of the State Grange, Hon. Wm. Cyrus, may be interesting to your many readers.

The story of Tweed's escape and wanderings is full of exciting and romantic interest. He disappeared December 5, a year ago, and was concealed by professional criminals.

Your correspondent has authority for the statement that Tweed has surrendered all his property and effects and made a complete assignment.
