One Year's Work.

The work on the O. & C. railroad be tween Oregon City and Canemah is progressing slowly. The changes that will be made in the line of the road requires the removal of large quantities of the rock bluff that lies along side of it. Next week work will be begun on a stone wall to take the place of the trestle work just south of town. This wall will be four hundred feet long and twenty feet high. After this work is done the b'asting of rock off of the bluff will be carried on more actively, as there will be less danger of accident to the roadbed that will delay trains. The nearness of this bluff to town, and the road where people are passing, pecosalistes the revoyal of the state of the place of the place of the state of the place of the place of the place of the state of the place of the place of the state of the place of the place of the state of the place of the place of the state of the place of the place of the state of the place of the trestle work just is visiting to take the place of the trestle work just is visiting to take the place of the trestle work just is visiting to the place of the trestle work just is visiting to the place of the p are passing, necessitates the revoval of rock in small quantities and therefore it will probably take one year to take off enough of the bluff to allow the setting of the truck back four feet and otherwise straightening the many curves it now contains. This work as it progresses will call for the employment of many men and will add considerbie to the interests and will add considerble to the interests of the working men in our midst. Mr. James Ryan, who has charge of the rockwork, is very careful and pays great attention to the people who pass below, in order to avoid accidents.

The indications are that the road will be through between Portland and San Erangisco willing a year, and we hallow.

Francisco within a year, and we believe that these changes are being made in order that fast time can be obtained on

Ploncer Cone.

Mrs. Mary E. Coulter died in Salem October 29th, and her body was brought down on the morning train Saturday. After services, held at the Episcopal church, Rev. J. W. Sellwood officiating, she was buried by the side of Mr. Good, in our cemetery. Mrs. Coulter was born in Springfield, Illinois, and came to Oregon with her father, Rice Dunbar, in 1846, the family settling about ten miles east from Sa'em. In 1847 she was united and has employed Mr. Eggleston as cook in marriage to D. H. Good, who died in for his popular hotel.

1871. She lived in this city for many Exhert Foster. Geo. years and was well and favorably known among the pioneers. Her pall bearers were men who bad known her for many years. In 1876 she was married to Mr. Coulter, but their married life was not a happy one, and they have lived separate for several years. She leaves six children—Geo. E. Good, of Salem; Mrs. Walker will remain her for the Braw, and Misses Minnie and Josie Good, at Walla Walla; Mrs. Sprigg and Miss Effle Good, at Portland. She also in the old Moss building, much to the disgust of the Chinaman who has had a controlled the contro O. W. Dunbar, and three sisters, Mrs. F. the only E. Hodgkin, of Salem, Mrs. Kirk Ward, months. of Seattle, and Mrs. Reynolds, of San Francisco, nearly all of whom were here at the funeral.

Sad Accident.

Last week Mr. H. P. Bestow and his son Herbert went to spend a week with their friends, by the name of Hawkins, who live near St. Helens. The two families had a good time hunting, fishing, etc., until last Friday. On that day young Hawkins and young Bestow went out hunting ducks. They saw a flock coming and agreed to fire together crouching down in the grass for that purpose. Both fired but Bestow's gun hung lire, and young Hawkins arose in time to get the charge in his head. He died instantly. Herbert immediately ran for assistance and the body was conveyed to the home of his parents and buried Sunday.

The friendship existing between the boys began when both families lived in Canemah in 1882. No blame can be at tached for the actident to anyone. Herbert Bestow is a young man of steady habits and careful in his movements. He has many friends who, while they remark the accident decay and the statement of the st

Thigh Bone Broken

Last Saturday Mr. Joseph Diller, of Corvallis, took the steps out of his cellar to the workshop to mend them. While repairing them he found that he needed a tool that was in the celler. He went to the cellar and stepped right in, for getting that the steps were sent to the cellar and stepped right in, for getting that the steps were sent in the cellar and stepped right in, for getting that the steps were sent in the coller. He went is some miles up the Sandy, out driving the cows home account of horse to the coller to the cellar and stepped right in, for getting that the steps were sent in the cellar and stepped right in, for getting that the steps were sent in the coller to to the cellar and stepped right in, forgetting that the steps were gone. He fell a distance of six or seven feet and broke his thigh bone. Mr. Diller is father of Mrs. Thomas Charman and Mrs. M. M. Charman, of this city, and is eighty-four

'ACME" Pulverizing Harrow,

CLOD CRUSHER and LEVELER.

It is the BEST selling tool on earth. The profit derived from its use is not alone in the saving of labor and time, but in the thoroughness of the work accomplished by it. It is well known that "thorough pulverizing pays," by increasing the yield, and without doubt the "Acme" harrow will pay for itself on any ten-acre field in saving of labor and in the in-

harrow will pay for itself on any ten-acre field in saving of labor and in the increase of the crop.

While the "Perfect" is unexcelled for preparing any kind of ground, yet the strongest claims for it is on land that no other harrow will effect. It will pay for itself in a single season where any such land as the following is to be prepared:

On "blue grass sod" that has not been broken for several years. On "stiff or inverted sod" of any kind. On land that has been "plowed wet." On working down "tough, new prairie sod" to a perfect stubble. On "hard lime stone land."

On "stiff, stony clay land" On "hard baked or crusted land." On "black bettom land" where the plow will not scour; and, lastly, for the preparation of any kind of land where all other harrows have failed.

Substantial warranty given with every harrow. Try one and be convinced.

Substantial warranty given with every harrow. Try one and be convinced. Write for special pamphlets of the "Acme," containing full description and

Compete with Portland.

C. P. WINESET,

Undertaker, Wagon and Carriage Maker.

Main Street, Oregon City, Oregon.

I keep in my employ skilled blacksmiths to do work for the trade. I have reduced my prices greatly, as you will see by the following: Horse shoeing, all round, new shoes, per span 30.00: resetting old shoes, all round per span, 31.30, and all other classes of work proportionately. I am now carrying a more extensive stock in the line of WALNUT CASKETS CASKS and COPFINS than over before since in business here, and the FINEST grade of THIMMINGS and MOUNTINGS for same. My hears, it is always ready for any call in the country as well as the city, when required. I am under many obligations for past paironage.
