Also land in Clackamas county, near new motor line. Fine for farming. Terms easy. F. O. McCOWN & CO.

County Correspondence. SPRINGWATER, June 13, 1890. "Give us rain," is what all are saying.

The outlook for clover is the worst we have ever seen. Fall wheat is thin, but looks well. Oats are short for this time in the year, but have a good color. The fruit crop will be very heavy. Our singing school closed last Sunday, and the picnic on Monday was a success.

One evening last week some boys observed, as they thought, a clerical gentleman who has been in the habit of paying nocturnal visits to these parts, drive up and stop at a house for the night, leaving his buggy standing outside.

UNION MILLS, Or., June 16. EDITOR ENTERPRISE: Milk Creek claims to be well up towards the head of the procession in the matter of celebrating wedding anniversaries of "auld lang syne."

In March last Molalla Grange celebrated the 39th anniversary of the marriage of grandpa and grandma Darnall, and on Saturday the 28th anniversary of grandpa and grandma Worsham's wedding.

The ladies of the Grange had been preparing for the event for some time; but only two weeks ago word came that "grandma Worsham is dangerously sick."

On the centre of the table stood one of Aunt Kate Goucher's masterpieces, a five story wedding cake, flanked right and left by—well, Mr. Editor, if you have ever attended a country grange dinner it is not necessary to describe the loads of good things to be found there, and if not, I pity you.

Grandpa and grandma Darnall were both able to be out, and among other visitors present were Mr. O. Lovejoy and family, of Oregon City, and grandma Wright, of Molalla. As Mr. and Mrs. Lovejoy spent Sunday at Dr. Goucher's, about 20 of the neighbors gathered in to help entertain them and keep them from getting homesick.

School Report. CANY, June 10, 1890. The following pupils, belonging to the Canby school, were neither absent nor tardy for the month ending May 24: Arthur Knight, Ralph Knight, Laura Knight, Annie Johnson, Roy Johnson, Winnie Mattson, Eva Avery, Evie Avery, Chester Hodges, Clarence Wilson, Victor Carothers.

Number of pupils belonging for the month, 47. Average daily attendance, 35. For the month ending May 30th, Winnie Mattson, Pearl Milligan, Victor Carothers, Pearl Farrington, Frank Turpin and Elsie Buchanan were neither absent nor tardy.

Number belonging for the month, 49. Average daily attendance, 38. GEORGE L. STORY, Teacher. —Try, the cash grocer, makes a specialty of fine groceries.

CROP-WEATHER BULLETIN—No. 14. For Week Ending Saturday June 14.

The week has been cool and partly cloudy, with light sprinkles of rain on Sunday, Monday and Saturday. The rainfall was light and did not much more than to lay the dust. Vegetation of all kinds would be benefited by good heavy rains, and especially would the wheat crop be benefited.

Haying is generally in progress, and light yields are generally reported. The continued dry weather proved to be quite injurious to the hay crop in most sections.

The fall and early sown spring wheat is in good condition. They would be benefited by rain, but if no dry north winds prevail the crop will average very well. The late sown spring grain continues to be in a poor condition, and less than one-half the average, from spring sown grain is expected.

Remedies Against the Codlin Moth. There are two modes of fighting the codlin moth generally made use of—one is to prevent the hatching of the egg, or the killing of the young worm while working in the fruit; the other is catching the worm in traps as it is escaping from the fruit, or having the fruit eaten by hogs as soon as it drops from the tree and before the worm escapes.

The first mode is without doubt the most successful, and is also the least expensive. This is accomplished by spraying the trees with London purple or Paris green, using one pound of either to one hundred and fifty gallons of water. Paris green is a compound of arsenic and copper. It is a far more powerful poison than arsenic alone, and is not soluble in water, hence it will remain much longer on the trees. London purple is another arsenical compound. It is the residue from the manufacture of aniline dye, and contains lime, arsenous acid and carbonaceous matter. It is soluble, more adhesive and less poisonous than Paris green.

It is better to wet the powder thoroughly and make a paste before putting it into the vessel of water, that it may not form lumps. The liquid should then be strained, thereby removing the sediment that is in the London purple. Some have reported to this Board that the London purple burned the foliage. This, doubtless, arises from difference in the strength of the London purple, and we recommend that care be exercised and tests be made before using, so that it shall not be too strong. The spray is caused by forcing the liquid, by means of a force pump, through a fine perforated nozzle, made specially for the purpose. The finer it is the less liquid will be required. The important thing is to scatter the spray on all the fruit.

WHEN TO SPRAY. The codlin moth, soon after the fruit sets, lays her eggs upon the calyx or blossom end of the young fruit. The grub, as soon as hatched, eats its way into the center of the young fruit, and there, growing with its growth, works its mischief. In its early state the young fruit is erect, its calyx or blossom end upwards, and the least particle of poisoned water falling upon it is sufficient to destroy the young worm when it attempts to eat its way into the fruit. Therefore, the best and most opportune time for spraying the tree is soon after the fruit is set, and when it is about the size of a small pea. Experience teaches, however, that it is not safe to depend on the one early spraying to accomplish the results sought for,

whether coming from a second and perhaps third crop, which many affirm and others deny, or from those that from some cause have not matured as rapidly as others; still the facts remain that in many places the codlin moth does not sting the fruit and lay the eggs until later in the season; therefore, to obtain the best results the spraying should be continued with an interval of two weeks until the first of August, and even later than this on some late varieties. Care should be observed that vegetables are not sprayed with these mixtures, and no animals be allowed to eat the grass that has been saturated with the spray, and that the spraying is not done while the trees are in bloom, for then it is that the bees are present.

Appropriations for Oregon. Relative to the river and harbor bill which passed the house, Mr. Hermann says that it is the most satisfactory bill of the kind that has ever passed. He congratulated congress on its work, and said that while this would be welcome tidings to the people of the great lakes on the North, the Gulf on the South, and the large and smaller rivers of the Atlantic side, it would be more heartily welcomed by the expectant people of the Pacific Northwest. He said it was appropriate at this stage of a bill in which the waterways of his own state had been so loyally remembered to read to the house a statement he had just received from Major Handbury, of Portland, which announced that the recent soundings of the Columbia river bar disclosed a depth of 254 feet at mean low water, and he said this was already a great triumph and a most conclusive argument in favor of the river and harbor policy of the government. He referred to the benefits which could be expected for the Cascade locks by liberal appropriations, as well as for other portions of the state, and he expressed a hope that congress would at an early date take action on the best railway project of the Columbia, which he stated would open a continuous navigation of 1000 miles, practically from the Rocky mountains to the sea. The Oregon items were all passed as reported from the committee, and no member is more jubilant than Mr. Hermann over the result.

The Men Who Will Compose Oregon's Legislative Bodies.

As near as can be ascertained from the returns now in, the next legislature of Oregon will stand as follows: [Republicans in Roman; democrats in small capitals, names of senators marked with an * are hold-overs.] SENATORS. Baker and Malheur—M. Dodson. Benton—C. B. Croson. Clackamas—E. L. Eastham. Clackamas and Marion—Harvey E. Cross. Clatsop—C. W. Falton. Columbia, Washington and Tillamook—*F. A. Moore. Morey, G. L. Story, C. H. Mendorfier, O. F. Botkin, J. F. Stewart. Polk—N. L. Butler, G. W. Myers. Sherman and Wasco—E. O. McCoy, C. W. Johnston. Tillamook and Yamhill—W. D. Stillwell. Umatilla—J. S. Richey, J. L. Killain, E. M. Gammere. Union—Chas. Goodnoth, J. A. Wright. Wallawa—A. W. Gowan. Washington—J. C. Moots, S. A. Durham, W. N. Barrett. Yamhill—S. W. Lampton, S. A. Manning.

Senate—Republicans, 21; democrats, 7; doubtful, 2. House—Republicans, 39; democrats, 18; doubtful, 2. Virtue of Apple Sauce. Probably not one in a thousand of the many persons who eat apple sauce with roast goose or roast pork have any idea why such a condiment should be used in these particular cases. Yet the custom is based, if not on exact science, certainly on a knowledge of the properties of the apple, as well as upon observation. The malic acid of the apple tends to neutralize any excess of chalky matter engendered by eating too much, and it also serves to eliminate from the body all noxious matters, which if retained, would make the brain heavy and dull, or lead to jaundice or skin eruptions. Apple sauce aids digestion, which, in the case of the rich meats with which it is usually associated, would be sluggish. Park Place is Popular Property.

Board of Equalization. Notice is hereby given that the city council of Oregon City will sit as a board of equalization of assessment on Friday, June 20, 1890, commencing at 8 o'clock, P. M. Any persons objecting to the valuation of his property must apply for a reduction of the same according to the charter before said time. L. L. Pours, 522 City Recorder, Oregon City, June 11, 1890.
