PAR JOSE, May 80, 1870. DR. ABORN—Duan Sm: I deem it my duty to make the following statement. For the past six years my dayplier (now eight years old) has been afflicted with sore eyes, and frequently unable to read, or even to distinguish me object from another across the room. She is now perfectly cured, after having been treated by you for three weeks only. I would also note that all previous treatment had proved unsucceptal; also that the eye-lids were so affected that the lashes were falling out. Since, under your breatment, they have grown in perfectly natural, so that now her eyes are perfectly natural, bright, and of a healthy apperance. I consider it a remarkable cure, and am agreeably sus prized at the result of your treatment, as I had given up all hapes of having her cured. Truly yours, J B CARTER.

Lieutenant Governor Holden's Card SAN PRANCISCO, April 6, 1870. Having suffered nine or ten years with a throat and bronchial affection, I applied to Dr. aborn, No. 22 Kearny street, who has theated me for about two months I feel it my duy to state, for the benefit of those afflicted in the like manner, that I found immediate, and I think, permanent relief from his treatment, and that I consider his treatment scientific, and that the doctor is master of his profession.

From Hon. James A. Johnson, Mem-ber of Congress. To Whom it May Concare: Having been a suffe or from cutarrh and severe bronchial affection for more than seven pears, and having found great relief by submitting myself to Dr. Aborn's treatment a few day only. I take pleasure in waying, Dr. Aborn with his new and improved instruments for I cal application to the lurge, air passages, eyes and ears, should encourage all who are afficied in those parts to cherish a lively hope that they may find quick and permanent relief. Very truly,

This is to certify, that for ten years I have suffered almost death with Nasal Catarrh, Bronchitis and Neuralgia of the Iread: The pains in my head were almost unbearable. My bearing was very much impaired, with a diagreeable noise in my ears. My eyesight was also impaired. In May last, I placed myself under the treatment of Dr Aborn, No. 21 Kearny Street, San Francisco, Cal., and in a short time the Bronchial affection was cured, my eyesight was also fully restored, and my hearing impraved. I take pleasure in bearing testimony to the skill of Dr. Aborn, in his successful treatment of these diseases.

Late Deputy Sheviff and Constable of Grass Valley Township, Neveda County, Cal.

On the 22d of January last, I applied to Dr. Aborn, at 22 Kearney Street, Ean Francisco, and placed myself under his treatment for dealerss and discharge from my left ear, that had baffled the ability of several physicians. Under Dr Aborn's treatment I bagan to improve at once, and in six weeks time. I was entirely well, I can now hear as well as I ever could, and the discharge is entirely oured, and havefuld no symptoms of a return of the discase since. As I am now satisfied that the curve in permanent, I cheerfully give this testimony to the shift of Dr. Aborn. Presentan Sacramento Union, resininh and E streets.

to consult Dr. J. P. P. Van Den Bergh. He told me my complaint was not consumption, but the cough expectoration and dropsical edusion was created by peculiar worms on the liver and gall bladder, what the doctor calls Distoma Hepaticum. In November last, I commenced his treatment, and from that time I grew better and better, and thank God and the doctor's medicine, the cough expectoration, dropsy and all my miseries have left me entirely, and I am now strong and healthy again. My present weight is 153 pounds. Persons with similar affections can see me at my residence, No. 638 Kearney street between Jackson and Pacific streets. San Francisco.

This is to certify that I was afflicted with a Cancer Tamor, which grew rapidly and of a large size in my mouth, on my lower jow, and troubled me a great deal in eating and spaking. I consulted a good many surgeons and physicians, and I could find none which would undertake to remeve it, till I consulted Dr. J. P. P van Den Bergh, and he removed the tumor and part of the lower jawbone, by a skillful operation with very little loss of blood, and healed the remaining wound in a remarkable short time; and I feel very thankful to the Doctor for relieving and curing me of a Cancerous Tumor which emicent surgeons thought would cause a lingering and painful death.

been in California, has by close observation and great experiments, come to the conclusion that there are more acute and chronic diseases cauded by worms, hydadids, animalcules or other species of entoxos. The public generally, or the profession at large, are not aware of the number of patients who are treated by eminent physicians for this, that, or such a complaint without any relief. If the disease had been understood, a few doses of Dr. V's Societies Worm Remedy would have immediately cured the complaint, and have saved a great many lives. Dr. V. has collected a large variety of California roots and herbs, which, by analyzing, close obversation and extensive experiments, he can conscientiously say that he has discovered new remedies for the successful cure of the following diseases:

De Aprin: I take pleasure in bearing testimony to your skill and treatment for Catarrh and Bronchial affections, having suffered for months and wasted in flesh from incessent coughing, night and day. I now find myself-cured as the result of your treatment, and I have gained thirty-three popular in weight.

DEBILITY.

DR. ABORN does not subject his patients to any painful or unpleasant operations, his treat-ment is mild and asfe for the most delicate child. The afflicted are hereby informed, that after the first visit, for many of the diseases which he makes a specialty, they can take the treatment home and use it until cured, without pain or in-terruption to their usual avocation.

Ware it not for the good which I hope it may have done to suffering humanity, by informing them where they could find reited, I should regret having given Dr. Aborn my little testimental of the tents of January, for the demands made upon my time, in an waring inquiries in regard to him, have been more manarous than profitable to me; and still they come.

To save the necessity for further personal application, let me say to those who sare for my opinion, that time has only strengthened my first favorable opinion of Dr. Aborn, and my confidence in the permans ney of the cure effected by him. All my difficulty aroje from catarrh, which had become of a serious pharacter, affecting the hearing and the threat, giving me at times acute pains, and at others unbitting sounds in the ears. Frequent headaches, and so seriously affecting the bronchial tubes as to dimetimes disable me from public speaking. All cases of Nervous or General Debility, Fremature Decay, etc., are treated by Dr. ACORN with such wonderful suncess that many case, after a few weeks treatment are scarce recognizable, such a change having been swught in them; as they have invariably in a short time gained from ten to thirty pounds in weight.

Convalescence and recovery after rapid under his new and scientific mode of treatment. But very few, if any, menol his age in the profession have been so universally successful as Dr. Aborn. Combining all his knewledge, skill and experience is his appeals brageh of the profession, all that the inventors of the age or the late discoveries of medical science have brought to the aid of the modern practitioner. Dr. Aborn is prepared to treat with almost unfailing success all such cases as may come under his care. He has, within the past few years introduced into his practice many new and important remodles, with novel and effectual modes of application, with which, during his professional career, he has produced the most successful and satisfactory results. Dr. ABORN, for twelve years past, has devoted himself exclusively to office partice for the treatment of obscinate chronic diseases, especially such cases as have resisted all the ordinary modes of practice. He has thus been enabled to treat at least five times as many patients annually as he possibly could had be treated them at their residences. Thus, he claims twelve years office practice, arcitaively devoted to specially years' experience in a general practice.

E ere hybridical mis more successful in a certain class of diseases than in others; and he who devotes his thoughts to a speciality is better prepared to treat it in that particular than one who is engaged in general practice.
