Dr. Strong has resigned the presidency of the Oregon University to accept the position of chancellor of the University of Kansas. It is unfortunate for Oregon to lose such an able educator as Pres. Strong has proven himself to be.

San Francisco people no longer have to "hoof it." The universal strike of the San Francisco street car employees was on the 26th declared off. The railways granting the demands of the strikers, which was an advance of wages for 10 hours a day service and full liberty to do as they please when not on duty.

WASHINGTON, April 28.—An effort will be made tomorrow to secure a favorable report from the Senate committee on public lands on the bill creating the Crater Lake National Park in Oregon. Some members of the committee have been a little fearful that the bill contained some hidden and objectionable provisions, but assurance has been given that this is not so, and that the bill is exactly what it appears to be, and nothing more. To overcome the suspicion of some Senators that railroad would be benefited by the bill, a report will be submitted from Land Commissioner Hermann showing that there are no railroad lands within 15 or more miles of the park, and that there is no provision in the measure which would permit fraud of any character. If the bill is reported, as expected, its progress through the Senate will probably follow shortly.

Grande Ronde Cont.

Lewiston Tribune
S. P. McNeal, of Hatson's Ferry, on Snake river says: "The work on the extension of the Wenatchee canyon road is being pushed. This road is being constructed entirely by private enterprise. The road has been divided into short sections and is being constructed by the citizens. When completed it will give the residents of Grouse a short road to Lewiston. By it they will be able to reach this place by 50 miles of travel. They are now compelled to travel 80 miles to get here."

Mr. McNeal, whose home is within a short distance of the coal finds on the Grande Ronde, has been working for the coal company throughout the winter. He says: "No doubt can now exist as to the permanency and character of the coal deposit. In one of the cuts a 30 feet coal deposit was exposed the full width of the deposit is not yet known."

"The coal has been tested by use in heating, steam making and in the forge, and has been excellent for all these purposes. If the proposed smelting plant for the reduction of the copper and other base ores of the Innaha is erected, and a railroad is built, these coal fields will of necessity be opened."

"The people of the Grouse country and the residents along the Grande Ronde feel greatly encouraged over the prospect for the future growth of the region. The O. R. & N. company has had parties of surveyors in that section. They have established an excellent grade survey along the Grande Ronde river, and it is believed the road will be built within a short time."

OREGON DAY AT FAIR

One of the Greatest Thus Far at Charleston.

EXPOSITION GROUNDS, CHARLESTON, S. C., April 26.—This was "Oregon day" at the exposition, and one of the most interesting, thus far, of South Carolina's great fair. The exercises at the Auditorium were well received. Representative Tongue delivered the principal address, speaking on expositions in general from an educational standpoint. He held that great practical commercial results may be attained by closer friendship and knowledge of individual wishes and desires. The address is generally pronounced one of the most logical and interesting delivered on any state day. Captain Wagener, in his welcoming remarks paid a pleasing tribute to Oregon's exhibit, and the great assistance of the state in sending such wonderful and interesting attractions. The Commissioners were praised for lending help, in every way toward the exposition.

Rev. Charles Vedder, pastor of the Huguenot church of Charleston for 36 years, and one of Oregon's best friends in Charleston, reverently commended the great Northwestern State.

Commissioner H. E. Dosh spoke on Oregon's relationship to South Carolina in a manner which brought forth great applause. His tribute to the City of Charleston, and words of thanks for the hospitality extended Oregon people, were pleasingly presented.

Albert Tozier spoke of Oregon's advancement, her resources, enterprises and possibilities, explaining the way the Northwest was to have a great exposition in 1905, and that its success was assured. Mr. Tozier's subject "Lewis and Clark Centennial," appealed to the people, and his remarks were received with much applause.

The band played "The Second Oregon Volunteers" and several Southern airs between the addresses. Besides Charleston people in attendance upon the exercises, there were commissioners and visitors from other states, and a large number of delegates to the recent meeting of the National Editorial Association. At the close of the exercises, a reception was held at the Oregon headquarters, which was attended by representatives of all the Western states. During the afternoon Captain Wagener, president of the exposition, gave a banquet to Oregon people and a number of Charleston people.
