What To Watch

Veggies Set Sail For Adventure In Noah's Ark

(NAPSA)-Bob the Tomato, Larry the Cucumber and the whole VeggieTales crew are joined, two by two, by animals galore in the music-filled animated adventure "Noah's Ark"-the first Bible-themed VeggieTales production in more than four years-as it debuts March 3 on DVD and digital download.

Wayne Brady, Grammy-nominated and multiple Emmy Award-winning star of TV's "Let's Make a Deal," sings seven of the nine original songs in "Noah's Ark," and stars alongside the Veggies and Christian music superstar Jaci Velasquez.

Brady plays Shem, the son of Noah, who first questions, but then comes to embrace, his father's direction from God. "I love the music and messages of VeggieTales, and my daughter is a big fan, so saying 'yes' to being in a Veggie-Tales movie was a no-brainer," Brady says. "The best part is, Bob and Larry are down to earth and they never let the 'I'm a global Veggie superstar' thing go to their heads."

Velasquez says the VeggieTales version of Noah's Ark contains important messages for kids-and for their parents. "Noah's Ark" is about patience, trusting and believing, and those are things kids need to understand," explains Velasquez, who has sold nearly 5 million albums and also hosts her own weekly national radio show. "Whatever we pour into our children will pour out of them-what they learn as children is what they will be as adults. We are planting seeds in their hearts and souls, and it's important for them to understand that God has a purpose and a plan, and we have to learn how to trust it. That's a big lesson, and 'Noah's Ark' helps parents start to teach it."

and Sadie (Velasquez) return home from their honeymoon to find that Noah has begun, at God's direction, to work on a massive ark, which his wife Naamah and sons Ham and Japheth are helping construct before the start of 40 days and 40 nights of rain.

But Shem doesn't understand Noah's unshakable faith in God, particularly when animals start arriving two by two-while the rain is nowhere to be seen. When the deluge does come, Shem begins to understand Noah's determination to preserve humanity's future...and the importance of trusting in God.

"Noah's Ark" also features a brand-new "Silly Songs With Larry" segment, in which Larry dons a safari outfit as he goes on a quest for a gigantic, golden egg.

Less than three weeks after the DVD and digital download release of "Noah's Ark," the VeggieTales excitement continues when five all-new episodes of "VeggieTales In the House," the hit animated series, debut

exclusively on Netflix-bringing the total of "VeggieTales In the House" episodes to 15 as the series continues its first season.

Changes In Technology Can Present Opportunity For Small And Midsize Businesses

(NAPSA)-Thanks to new technology, it's an exciting time for small and midsize businesses. That's because many are finding that increased access to new technology-such as cloud and mobile solutions-can provide access to services that were never within their reach before, helping them grow and be more productive.

They are also finding that using old or outdated technology can hinder a company's ability to do business in a number of ways-from security risks and compliance issues to not being able to implement even modest changes or updates in software, all of which can significantly hamper a company's ability to be successful and competitive.

A Shift In Technology
The beginning of one era in technology often means the end or phasing out of another. For example, to accommodate the shift toward modern technology used by a growing number of small and midsize businesses, Microsoft will end support for Windows Server 2003 on July 14, 2015.

This means that security patches and updates will no longer be available after this period, resulting in a less stable and less secure technological infrastructure if no action is taken. However, the good news is that a variety of easy-to-integrate options are available for those ready to upgrade, including Microsoft Azure, the company's cloud platform. Cloud solutions such as Azure are designed to provide small and midsize

By embracing more modern, up-to-date technologies, small and midsize businesses are able to innovate in a way that allows them to outpace the competition.

businesses with the ability to scale up or down to take advantage of opportunities or cut costs, all based on their needs.

Numerous Benefits
Many small and midsize businesses report that moving to a cloud platform like Azure provides a range of benefits-including increased backup capacity, enhanced disaster recovery capabilities, consistent compliance with regulatory demands and access to the most modern applications. These benefits can help small and midsize businesses move faster, reduce costs and, ultimately, be more productive.

Backup: Today's businesses generate more data than ever before. The cloud offers reliable and economical backup for data for businesses of any size, and it even automatically replicates data to help guard against unexpected hardware failures.

Disaster recovery:

Backup is a great solution to protect your business from data deletion and corruption-but it isn't the only important factor when it comes to data. Disaster recovery with Azure means your company's data and applications will be replicated in the cloud and accessible at any time should anything happen to your physical location.

Compliance: With data security comes legal and regulatory requirements. With cloud platforms like Azure, your security software will be continually updated, making it easy for your business to ensure it remains compliant with unique industry requirements.

Modern applications: The cloud provides the infrastructure, platform and custom-made solutions in one place, rather than having to cobble solutions together piece by piece. This helps make it possible for small or mid-size companies to spend less time troubleshooting IT issues and more time on activities that will drive the business forward.

Now is the time to plan your transition-and Microsoft is here to help. For more information, please visit www.microsoft.com/en-us/server-cloud/products/windows-server-2003. To find a Microsoft partner in your area to assist in your cloud transition, visit www.pinpoint.microsoft.com.
