Legion directs flag retirement ceremony

PHOTO BY JACK DAVIS/SIUSLAW NEWS

Members of the American Legion instruct Daughters of the American Revolution volunteers in the proper disposal of the American flag during Sunday's Flag Day retirement service held in Old Town. A U.S. Coast Guard color guard was also present. Respectful burning is the accepted way to dispose of worn American flags.

City's 2014 Water Quality Report now available

"The City of Florence works hard to ensure that our water not only complies with, but exceeds state and federal drinking water standards," said Public Works Director Mike Miller. "In addition, the city was recognized as an outstanding performer in 2014 by the Oregon Health Authority, Drinking Water Services. This report shows our efforts are working."

As a water supplier, the city is required by the Environmental Protection Agency (EPA) to provide an annual Consumer Confidence Report. Commonly known as

a Water Quality Report, it provides water quality data from Jan. 1 to Dec. 31, 2014.

The report also informs customers of the location of the city's water sources, the city's source water protection programs, if there are any contaminants in the drinking water, as well as the water analyses undertaken to ensure that the water delivered is safe and of the highest quality.

In addition to the legally required language, the 2014 version includes information regarding source water protection, fun and informative water facts, a chart displaying daily water production as well as a water cycle activity for kids.

The 2014 edition once again includes a graphic on our local

dunal aquifer system.

Created by local artist Katie Miller, the graphic clearly shows how water travels from the aquifer to the home.

"Florence's dunal aquifer system is the only one of its kind in the State of Oregon," said Miller. "Protecting it and providing our residents with high quality drinking water is our top priority."

The 2012 edition of the report was recognized by the Pacific Northwest Section of the American Water Works Association (PNWS-AWWA) with an Excellence in Communications award in 2014.

Every year, the PNWS recognizes water utilities that go above and beyond in communicating their water's quality to consumers.

Founded in 1927, the PNWS-AWWA provides leadership to drinking water professionals in Idaho, Oregon and Washington in the areas of water quality and distribution, water resource policy, conservation and engineering.

To request a paper copy of the 2014 Water Quality Report, contact Public Works at 541-997-4106.

Copies are available online at www.ci.florence.or.us/publicworks/water-quality-consumer-confidence-reports as a downloadable pdf.

Paper copies will only be mailed by request or a copy can be picked up at the Public Works building, 989 Spruce St., or at City Hall, 250 Highway 101.

Florence Humane Society members to hold annual meeting tomorrow

The annual meeting of the Florence Area Humane Society is Thursday, June 18, at 5:30 p.m. in the Bromley Room of the Siuslaw Public Library, 1460 Ninth St.

Theme for the day's program is "The Future of FAHS," according to board president Frankie Jorgensen.

"The board encourages members to attend this meeting

to hear about the accomplishments, challenges and direction of our organization," Jorgensen said.

Members who have not renewed their membership may do so at the meeting, and membership forms will be available for those who would like to become a member of FAHS.

The Florence Area Humane

Society has operated a no-kill shelter serving the people of western Lane County since 1992. FAHS is a private, non-profit organization and receives no government funds.

The shelter is supported by donations from members and supporters and from sales at the two thrift stores in Old Town as well as frequent fundraising projects.

Summer Auto Tips:
Cooling System: The greatest cause of summer breakdowns is overheating. The cooling system should be completely flushed and refilled about every 24 months. The level, condition, and concentration of the coolant should be checked periodically. The tightness and condition of drive belts, clamps, and hoses should be checked by a pro.
