

THE RECORD

Dunes City street closures scheduled to begin Aug. 17

DUNES CITY — Asphalt pavement overlay and maintenance work will be underway on Russell Drive during the remainder of August.

Preparatory work is expected to begin during the week of Aug. 17.

The initial construction activities will consist of repair and replacement of designated sections on Russell Drive (entire length), followed by

placement of a new asphalt concrete overlay between the limits of Rio Drive to the end.

The work is necessary for the streets to be maintained properly and to insure the maximum life possible of the existing asphalt pavement.

This maintenance will affect vehicular traffic and access to homes while the work is being accomplished.

The selected contractor,

Johnson Rock, has made it clear that for pavement improvements to work properly, and to ensure the city receives the maximum value from its investment, it is imperative that no one drive or walk on the freshly paved street section directly following its placement for a period of 4 to 6 hours.

Residents and the general public will be notified through

the contractor's traffic control measures regarding when vehicle and pedestrian traffic will be permitted back on the street.

The affected areas will be barricaded off with traffic cones until through traffic is allowed within the newly paved area.

Arrangements will be made

to accommodate homeowners and delivery vehicles to whatever extent possible during the street maintenance curing period.

The following streets will be effected by this construction project:

- Russell Drive: Overlay and designated existing pavement

removal and replacement areas.

- Rio Road: No actual pavement work on this street at the present time; however, residents will be subject to traffic control measures for ingress and egress.

Rio Road is scheduled for slurry sealing pavement maintenance work next season.
