The head of a turkey has very few feathers. But, it does have a **snood** and a **wattle**!

The **snood** is a fleshy body part that hangs over the turkey's beak. The **wattle** is the fleshy area on the turkey's throat.

When a turkey becomes frightened, agitated, excited or ill, the snood and wattle can change from their usual pale pink or bluish gray color to red, white, or blue.

Turkeys can run at speeds up to 25 miles per hour and can fly as fast as 55 miles per hour!

Have three players race to unscramble these Thanksgiving dinner words. The winner gets the first slice of pie.

Stones in the stomach?

A part of the turkey's stomach contains tiny stones that the bird has previously swallowed. This organ has strong muscles and uses the stones to grind up food. Color the spaces with one dot to see what it is called.
