9 - HOLE COMPETITION	ROBIN VACCARO
GAME: LEAST PUTTS	TERRI PENNINGTON
TOP FINISHERS IN ORDER:	SUE SCARBERRY
CAROL MOORE	KP # 4 : ROSALIE JOHNSON
ROSALIE JOHNSON	

Fishing from 1B

trout, casting small spinners, spoons or fly fishing streamers or dry flies can be very effective.

WILSON RIVER: Steelhead, Chinook, cutthroat

Fishing for steelhead and spring Chinook is slow. The water is low and clear, so use lighter gear and target the deeper holding areas. Trout angling should be fair.

YAQUINA RIVER: Cutthroat

For cutthroat trout casting small spinners, spoons or fly fishing streamers or dry flies can be very effective. Angling for all species in streams above tidewater is restricted to artificial flies and lures until Sept. 1.

COOS COUNTY LAKES AND PONDS: Trout, warmwater fish

There are trout available for kids in the Millicoma Pond at the Millicoma Interpretive Center and fishing is excellent.

Millicoma Pond is set aside for kids fishing only and is a great chance for them to hook into fish. Call before traveling to Millicoma Pond to make sure the gates are open. The phone number is 541-267-2557.

Fishing for largemouth bass is best in mornings and late evenings. Bass will be found in a little deeper water associated with cover, like weedlines or other structure.

Bluegill fishing is picking up with many fish found in or near shallow water. Plastic worms, shallow crankbaits, topwater lures, and spinner baits are good to use for bass. Bluegills will bite on worms, small jigs, or flies.

UMPQUA RIVER, SOUTH: Bass

Trout fishing is catch-and-release only in the South Umpqua and tributaries. Bass fishing should be good with warmer water temperatures.

TENMILE BASIN: Trout, bass, yellow perch

Trout fishing has been slow in Tenmile Lakes due to warm water. Trout anglers should fish in the deep water and fishing is usually best in the mornings.

Largemouth bass fishing has

been good over the past month. Anglers are catching bass near structure or on the deep end of the weed lines using spinner baits, jigs, or rubber worms. Top water lures have been effective in the early mornings or evenings.

Fishing for yellow perch has been slow in Tenmile Lakes. Anglers fishing along the edge of the weedlines are having the best success. Worms fished near the lake bottom work very well for catching yellow perch.

The water level in the lakes is very low so boat anglers should use caution.

COOS RIVER BASIN: Dungeness crab, bay clams, rockfish

Angling is restricted to artificial flies and lures in streams above tidewater.

Anglers have been catching a few rockfish along the jetties and submerged rock piles. The marine fish daily bag limit for bottom fish (rockfish) is seven fish and a separate daily limit for lingcod (2). Anglers can only keep three blue rockfish and one canary rockfish as part of their daily limit and there will be no harvest of China, quillback, or copper rockfish. Retention of one cabezon per day is allowed.

Crabbing has been decent for those crabbing from a boat with the best crabbing near high tide. There has been a mixture of hard shell and soft shell crab in the catch. It is still recommended you discard the crab viscera (guts/butter) before cooking.

Recreational harvest of bay clams remains open along the entire Oregon coast. Clamming is excellent during low tides near Charleston, off Cape Arago Highway, and Clam Island. There are also good places to dig clams even on positive low tides in Coos Bay.

NOTE: Recreational harvest of razor clams is closed from the north jetty of the Siuslaw River south to the California border due to elevated levels of domoic acid. This includes all beaches and all bays.

Before any shellfish harvest trip, make sure to check the Oregon Department of Agriculture website for any

updates.

WINCHESTER BAY: Bottomfish, perch

Fishing for bottom fish in the Triangle and South jetty has been successful.

PACIFIC OCEAN AND BEACHES: Bottomfish, Dungeness crab, surf perch, salmon, halibut

Recreational harvest of crab is open along the entire Oregon Coast. It is still recommended you discard the crab viscera (guts/butter) before cooking.

Razor clamming is closed south of the north jetty of the Siuslaw River.

Anglers fishing the beaches from Coos Bay to Bandon have been catching redbait surf perch.

Sand shrimp or Berkley Gulp sand worms have been working the best for bait. Surf perch fishing is usually best on the incoming tide.

Recreational ocean salmon fishing from Cape Falcon to Humbug Mt. is open for all salmon except coho salmon.

Anglers are allowed two

salmon per day with a minimum size for Chinook at 24 inches or larger. The selective coho (fin-clipped) season opened on June 25 with a quota of 26,000 coho.

Fishing for salmon in the ocean has been very slow. As of July 3, 99 percent of the selective coho quota remains.

Anglers have been catching tuna about 20-30 miles west of Coos Bay.

The Nearshore Halibut season is open seven days a week from Cape Falcon to Humbug Mt. As of July 3, 67 percent of the nearshore quota remains.

Fishing for bottom fish is now closed outside of a line approximating the 30-fathom curve.

Fishing for black rockfish has been good from Coos Bay south to Bandon. Fishing for ling cod has been decent. The marine fish daily bag limit is seven fish and a separate daily limit for lingcod (2). Anglers can only keep three blue rockfish and one canary rockfish as part of their daily limit.

...need a friend?

Meet Rosie

I'm Rosie a petite 10 pound lover. I heard them say they think I'm a deer chihuahua because I have long legs and sharp facial features. I love love love to play, but I have no problems making time for sitting in your lap. I would really enjoy having a dog friend to play with. I am currently in a foster home and they would be happy to meet you and discuss what a great dog I am. Please place an application so the folks at the shelter can make arrangements for us to meet.

If you would like to meet Tucker any of his friends, please visit us at:
