

Fishing from 1B

the Millicoma Interpretive Center and fishing is excellent.

Millicoma Pond is set aside for kids fishing only and is a great chance for them to hook into fish. Call before traveling to Millicoma Pond to make sure the gates are open. The phone number is 541-267-2557.

Fishing for largemouth bass is best in mornings and late evenings. Bass will be found in a little deeper water associated with cover, like weedlines or other structure.

Bluegill fishing is picking up with many fish found in or near shallow water. Plastic worms, shallow crankbaits, topwater lures, and spinner baits are good to use for bass. Bluegills will bite on worms, small jigs, or flies.

UMPQUA RIVER, SOUTH: Bass

Trout fishing is catch-and-release only in the South Umpqua and tributaries. Bass fishing should be good with warmer water temperatures.

TENMILE BASIN: Trout,

bass, yellow perch

Trout fishing has been slow in Tenmile Lakes due to warm water. Trout anglers should fish in the deep water and fishing is usually best in the mornings.

Largemouth bass fishing has been good over the past month. Anglers are catching bass near structure or on the deep end of the weed lines using spinner baits, jigs, or rubber worms. Top water lures have been effective in the early mornings or evenings.

Fishing for yellow perch has been slow in Tenmile Lakes. Anglers fishing along the edge of the weedlines are having the best success. Worms fished near the lake bottom work very well for catching yellow perch.

The water level in the lakes is very low so boat anglers should use caution.

COOS RIVER BASIN: Dungeness crab, bay clams, rockfish

Angling is restricted to artificial flies and lures in streams

above tidewater.

Anglers have been catching a few rockfish along the jetties and submerged rock piles. The marine fish daily bag limit for bottom fish (rockfish) is seven fish and a separate daily limit for lingcod (2). Anglers can only keep three blue rockfish and one canary rockfish as part of their daily limit and there will be no harvest of China, quillback, or copper rockfish. Retention of one cabezon per day is allowed.
