

Hope

The reason why we volunteer, raise money, donate and walk with American Cancer Society

Why participate in Florence's Relay For Life, put together a team to raise money, volunteer on a committee or buy a luminaria? Why? Research, that's why!

Research that gives:

HOPE that there will not be a call with the news that a dear friend has advance lymphoma.

HOPE that your dear friend/mother/sister learns that there is a cure when she is diagnosed with breast, ovarian or cervical cancers.

HOPE that your dear friend/father/brother learns that there is a cure for prostate, testicular or breast cancer.

HOPE that you don't get a call about

cancer and know that this person whom you love and the people in their lives have a rough road ahead.

HOPE that when you do get that call you know that the research, that Relay For Life supports, will give that person and the people in their lives the support they need and HOPE FOR A CURE!

HOPE that the next call about cancer is from that person you love and they are cancer free.

Research is expensive. So, if you want hope, then research must be supported. Volunteer, donate and help raise money for research, support and the ultimate cure.

How American Cancer Society is saving lives

As the world's largest movement to end cancer, 4 million people across the globe participate in the more than 6,000 American Cancer Society Relay For Life events held each year.

Together with its millions of supporters, the American Cancer Society saves lives by helping people stay well and get well, by finding cures and by fighting back.

It is the largest private, not-for-profit funder of cancer research and has played a role in nearly every cancer

breakthrough in recent history.

More than \$4 billion on cancer research since 1946 has:

- Helped people take steps to prevent cancer or find it at its earliest, most treatable stage.
- Developed guidelines for recommended screening tests, so people know what tests they need to help prevent cancer or find it early.
- Created nutrition and physical activity guidelines to help people eat healthy and get active.
