Keeping you safe in an emergency.

To stay safe in a burning building, a firefighter must wear special gear. A turnout coat, for example, is a special jacket designed to protect a firefighter from heat and flames.

Reflective stripes on the coat and pants help firefighters see one another in a dark, smoky building.

Smoke can be one of the biggest dangers in a fire. Firefighters wear face shields and an air mask to be able to see and breathe.

If a fire breaks out in your home, it is VERY important to STAY LOW. Crawl towards an exit as quickly as possible to avoid breathing in smoke. And if a firefighter wearing gear like in the photo above is there, don't be afraid. They're there to help!

When everything on your checklist is a YES, complete and display this certificate in your home!
