4	32.50	6.50	A				J. Weatherwax - J. Smith		

Fishing from 1C

and 3/year. Casting spinners, drifting bait or using a bobber and jig can be effective. **WILSON RIVER: Steelhead** Fishing was slow on the Wilson last weekend due to high water and marginal conditions. It should be dropping into prime shape by the end of the week and through the weekend. There should be plenty of broodstock hatchery and wild steelhead around, and there have been some big fish coming off the Wilson this year.

Casting spinners, drifting bait or using a bobber and jig can be effective. **WILSON RIVER: Steelhead** Fishing was slow on the Wilson last weekend due to high water and marginal conditions. It should be dropping into prime shape by the end of the week and through the weekend. There should be plenty of broodstock hatchery and wild steelhead around, and there have been some big fish coming off the Wilson this year.

All the usual techniques such as side drifting, float fishing, drift fishing, or pulling plugs or divers and bait should be effective. **YAQUINA RIVER: Steelhead** The Yaquina River and Big Elk Cr. are open for steelhead. Fishing is fair. Wild winter steelhead can be retained on Big Elk Cr. with a daily and annual bag limit of 1/day and

3/year. The Yaquina River is open for hatchery winter steelhead. Casting spinners, drifting bait or using a bobber and jig can be effective. **COOS COUNTY LAKES AND PONDS: Trout** A few hatchery male steelhead were stocked into Middle Empire Lake this week to allow anglers for more opportunity. Fishing regulations for these stocked steelhead in Empire Lakes are just like the trout regulations. Anglers can keep 1 fish over 20 inches per day and only need their fishing license. Fishing for trout in other area lakes has been slow. Trout

stocking in area lakes will start at the end of February/early March. **COOS RIVER BASIN: Dungeness crab, bay clams, rockfish, steelhead** Trout fishing in streams is now closed until May 22, 2017. Currently all steelhead rivers in the Coos Basin are high and muddy. The West Fork Millicoma River will be the first river to clear. When water conditions are good, anglers are still catching fish throughout the Coos Basin. Anglers are drifting eggs or corkies along the stream bottom or using a jig suspended under a bobber. Anglers fishing the South

Fork Coos River above Dellwood will need a permit from Weyerhaeuser, which they can pick up at the Dellwood office. In the Coos Basin 1 additional hatchery steelhead may be retained per day for a total aggregate of 3 adult fish harvested daily. Anglers have been catching a few rockfish and surfperch along the jetties and submerged rock piles. **COQUILLE RIVER BASIN: Crab, steelhead, salmon** Trout fishing in streams is now closed until May 22, 2017. All of the Coquille Basin steelhead rivers were high and muddy this past weekend. Anglers have been catching hatchery steelhead at LaVerne Park on the North Fork Coquille River and on the South Fork Coquille River from Powers downstream to Broadbent. Bank anglers have been plunking with Spin-n-Glos and bait near the town of Coquille. Anglers have had success drifting eggs or corkies. In the Coquille Basin 1 additional hatchery steelhead may be retained per day for a total aggregate of 3 adult fish harvested daily. Recreational crabbing is open in the Coquille estuary but crabbing is very slow due to the large amounts of freshwater coming downstream. **TENMILE BASIN: Trout, bass, steelhead** Trout fishing in the streams of the Tenmile Basin are now closed until May 22. Trout fishing in Tenmile Lakes is open all year. A few steelhead have been reported in Tenmile Creek.
