Soil is a living, breathing, natural entity made of solids, liquids, and gases. It provides habitat for organisms, recycles waste products and filters water. Soil provides structural stability for plants, and retains and relinquishes water and the nutrients necessary for plants to grow. Most soil scientists agree that soil composed of 25% water, 25% air, 45% mineral matter, and 5% organic matter make up an ideal ratio for plant growth.

MEET GAGE

Umm Hi it's me Gage. I enjoy visits with kids for some reason they bring out my inner puppy. Adults are another story, it's not that I don't like you I just don't know you. I like other non aggressive dogs. My preference is to live mostly outside. Well that's about all for now, I am in a foster home and my foster dad would love to talk to you some more about what a good boy I am. And applicants with other dogs must do a doggy meet and greet upon approval.

WE NEED A HOME...

If you would like to meet these two or any of their friends, please visit us at:

MEET BUBBA

Bubba is a big ole boy who loves to play with his toys. He will bat balls back and forth with you. He likes to be pet and in a home would most likely cuddle up next to you and with time on your lap. He seems to do well with other cats. Bubba has been with us right at a year.
