

DID YOU KNOW?

Your **hearing health** has a direct effect on your **overall health**.

360 million
people worldwide
have disabling
hearing loss.¹

Hearing loss is a major public health issue.

It is the **third most common physical condition** after arthritis and heart disease.²

18-69-year-olds with hearing loss

had **significantly higher instances** of moderate-to-severe depression.³

The average person waits 7-10 years between first noticing their hearing loss and finally taking action — DON'T LET THIS BE YOU.

Best For Hearing is a family-owned business with a 38-year history in providing hearing help to those with hearing loss. We are committed to the total hearing health needs of our patients and their families and recognize that hearing impairments effect not just individuals, but entire families.
