

Fishing from 1B

Trout fishing in streams are open. Check regulations for open areas and gear restrictions.

SALMON RIVER:
Cutthroat trout

Trout fishing in streams has reopened, time to hit the river. Check the regulations for open areas and gear restrictions.

SILETZ RIVER:
Summer steelhead, spring Chinook, cutthroat trout

The Siletz River is open year-round for steelhead and summer steelhead fishing has been slow so far this season but should improve towards the end of June and the early part of July. Anglers are catching summer steelhead throughout the system but the best fishing is in the Moonshine and gorge areas. The summer steelhead fishery picks up in May and peaks in June and July.

Fishing peaks mid-June through August and then

continues to produce fish until the heavy rains come in the fall.

The 4.0-mile bridge (aka Steel Bridge) in the Siletz gorge is open to motorized vehicles but is only open to public vehicles on the weekend.

Anglers can walk/bike in the road during the weekdays. If anglers do walk in they can park at the one mile gate and start from there.

Trout fishing is open on the Siletz. Check the regulations for open areas and gear re-strictions.

YAQUINA RIVER:
Cutthroat trout

Trout fishing in streams has opened.

TENMILE LAKES:
Trout, warmwater species, largemouth bass

Conditions should be prime for bass, crappie, bluegill, and brown bullhead catfish fishing at this time. Anglers also use small jigs or a worm on a hook fished near the bottom to catch yellow perch.

The Tenmile Lakes have been stocked with legal-size rainbow trout.

Tenmile Lakes provide some nice holdover trout this time of year, and some can measure over 17-inches long. Try trolling slowly with a spinner or spoon, tipped with a worm, to catch these larger trout. Trout fishing

may slow down with warmer weather, as the summer progresses.

UMPQUA RIVER, SOUTH: *Trout, bass, warmwater*

Some stretches of the South are closed to fishing still. Please consult the fishing regulations for more info. Trout fishing in the entire basin is catch-and-release only. Bass fishing has been good throughout.

WINCHESTER BAY:
Bottomfish, perch

Fishing in the Triangle and South jetty has been successful.

PACIFIC OCEAN AND BEACHES:
Bottomfish, salmon, halibut, surfperch

Bottomfishing has been good when the ocean lays down and anglers have been able to make it out.

Bottomfishing is restricted to inside the 40-fathom regulatory line. Fishing for lingcod and rockfish has been good when the ocean is calm enough to fish. The daily bag limit for ma-rine fish is 5 plus 2 lingcod. The retention of cabezon is closed until July 2019.

Anglers may also choose to fish the offshore longleader fishery outside of the 40-fathom regulatory line, which is open year-round.
