QUESTION

Is it necessary to have my eyes dilated during every eye exam?

ANSWER

Whether eye dilation during an exam is necessary depends on the reason for your exam, your age, your overall health and your risk of eye diseases.

The eye drops used for dilation cause your pupils to widen, allowing in more light and giving your doctor a better view of the back of your eye. Eye dilation assists your doctor in diagnosing common diseases and conditions, possibly at their earliest stages.

They include:

- Diabetes • High blood pressure
- Macular degeneration
- Retinal detachment
- Glaucoma
