Fertilizer from seaweed

Nutrients in seaweed stimulate beneficial bacteria in garden soil, making it rich and healthy. You may want to collect some from a seashore to add to your own garden, but please check first if it is legal in your area to do so. Some experts suggest rinsing it to remove the salt, but others argue that the salt is minimal, and rinsing the seaweed removes valuable nutrients. Once dried, seaweed can be put directly into your garden soil, or chopped up and sprinkled into your potted plants.
