Safe Routes to School sidewalk project to begin soon on 26th, 27th streets

Cascade Civil Corporation will soon begin construction in the area of 26th and 27th streets. The project consists of installing new sidewalks along the south side of 26th Street between Oak Street and Highway 101; new sidewalk on the north side of 26th Street from Oak Street to the fire station employee parking lot; sidewalk in-fill along the north side of 27th Street between Pine Street right-of-way and the car wash; paved pedestrian pathway in the Pine Street right-of-way between 27th and 28th streets (completes the existing paved path); and new ADA ramps on Oak Street at 26th and 27th streets. Surveying activities began June 10 and contractor were moving in equipment through Friday (June 19.) Actual construction activities are scheduled to begin Monday June 22. The project is scheduled to be completed by the end of September. Over the next few months, proceed cautiously through the work zones or take alternate routes when necessary. Florence Public Works would like to extend its thanks to community members for their patience as the project moves forward to provide safe, accessible routes for the community within these street corridors. Although construction has been planned to minimize inconvenience, due to the nature of this construction project there will be slight inconveniences, particularly to the residents that live along the route of construction. For more information regarding the project, or if there are residents that live on the impacted street(s) that need special accommodations, call Public Works at 541-997-4106. Florence Public Works will work with the contractor to provide accommodations as best as possible. This project was made possible by a \$346,400 Safe Routes to School grant the City received from the Oregon Department of Transportation to improve, educate and encourage children on safely walking or biking to the Siuslaw Schools area through the construction of sidewalks, bike paths and enhanced safety crossings.
