Birds use plants

Birds forage among plants for seeds, flower nectar, berries, fruit, nuts and grains. They collect dried grass, pine needles, lichen, moss, twigs, small plant roots, plant down, plant stems, sticks and weeds to use in building their nests. Their favorite places for shelter are in a thorny hedge, spiky plants or trees, in high tree canopy, in densely foliated trees such as conifers, in the cavities of tree trunks or branches, flowering shrubs or in dense ground cover. — Brenda Weaver

MEET CHICKADEE

Chickadee is a senior cat, we are unsure of just how old she is, she came to us as a stray, and was not very trusting of people. She has come around to liking people and even wanting pets from them, when she wants attention. She doesn't care for other cats, and would do best in a home with no small children or dogs.

WE NEED A HOME....

If you would like to meet these two or any of their friends, please visit us at:

MEET GRISLEY

Hi there, my name is Grisley and I am a little over a year old. I am looking for a home that is high energy either going for several walks a day, hiking, playing at the beach, or just several hours of active playtime as I tend to chew if I become bored. I also need a home that is familiar with either Huskys or Akitas and with older children because of my energy level.
