3,000 tons of men both for the board. The Captain, from Astoria, had engaged all the seamen of the larger ship, as well as the three, and a part of the second, to do the bricklaying on all the houses in the town of Kalaina, the persons from Astoria being willing to work for a piece of work at a cent per brick. The bricklaying is now going on in good earnest; and the Captain has been engaged to lay the brick surrounding the residence of the Capt. of the Columbia, which is situated on the corner of Third and Main streets. The Capt. of the Columbia is a most useful man, and is doing more than his share toward the promotion of seamen's interests in this part of the country. The work is going on as fast as the brick can be furnished, and the skill and labor of the bricklayers is perfectly wonderful. The number of bricks required for the building is 200,000, and it is expected that the work will be completed within a few weeks. The bricklayers are paid 1.00 cents per brick, and the brick is supplied by the Capt. of the Columbia.
