REPUBLICANISM IN SPAIN.

Telegraphic dispatches from the East seem to indicate, within a short time the Republicans in Spain will have the upper hands, and whip out their old enemies.

Loyal troops at Seville moved against the insurgents on the 28th, and after two hours of fighting gained and held the leading strategic points in the city.

The Carlists have been defeated in Navarre, and seven hundred Republican prisoners have been released by the victorious army.

The Carlist force which has been laying siege to Berga, made an attack upon the town on the 26th, but met with a repulse.

The fighting on the 28th was severe all day. The insurgents occupied the churches of San Nicholas and San Martin, and the Plaza which had been strongly barricaded.

Should the Republicans hold their own, it would prove them and their cause worthy of each other. Should they eventually triumph over their enemies, over the Internationalists as well as the Carlists, it would be little less than wonderful.

They have received no word of sympathy from the monarchies of Europe. Even the French Government, which pretends to be Republican, not only gives no aid or support in word or deed, but allows her own territories near the Spanish borders to be occupied, or used by the Carlists as a convenient position for them, in which to plot and plan, and form plans for invasion of the Spanish Provinces, and from whence, as it suits them, to commence their assaults upon Spain.

And England, apparently forgetting the effects of her violation of international law in our war of the Rebellion, and for which she found herself in trouble, now, as then, allows her merchants and shipping-men to re-enact the wrong by smuggling arms and ammunition into the ports of Biscay, for Don Carlos and his adherents. Spain has literally all the government of Europe against her as a Republican nation, with the exception, perhaps, of Switzerland.

The Farmer's Granges are getting to be an acknowledged power in the land, and their action has had some effect on the policy of the general government, even. We note the following in a New York dispatch to the Boston Advertiser of the 1st ult: "In an indirect way the granges have been useful to the syndicate for placing the new loan, by creating distrust of railroad securities and turning investors to government bonds."

When Dr. Bayley was chosen to the town Council of Corvallis, last Spring, it was with the express object of opposing any effort on the part of Salemites to force the Capitol upon Corvallis.

Work on the new Capitol building at Salem is progressing rapidly. The disbursements are about \$9,000 per month. Krumbien & Gilbert are the architects.

The new Court-house at Salem is finished, but the \$40,000 debt is not paid. "A public debt is a public blessing."

Hon. J. W. Nesmith, Ex-United States Senator, is spoken of prominently as a candidate for Congress on the Democratic side.

The Liberal Republicans of Ohio have dissolved, and united with the departurists.

B. and "Old Salt."

ASTORIA, July 28, 1873.

EDITOR ASTORIAN: When the committee of the Astoria Chamber of Commerce accepted the work of making a report setting forth the facts as contained therein, and published in the ASTORIAN, and other papers throughout the State, we expected criticism from the Press, but I must say that it has been quite flattering to find that without an exception they have spoken of it with fairness, and that those journals having the best opportunities for knowing its correctness, have noticed it with particular favor.

Concerning the statement of the committee that "no storms have visited the harbor that effected any damage to shipping riding at anchor in the bay or at the wharf," B. says, "the committee forgot the fact that a sudden squall threw the large ship Windward on her beam ends a year ago, and her masts and rigging were cut away before she was righted."

B. next whines about the small amount of the appropriation our representation in Congress secure for Oregon and says "California's share of the appropriation for various governmental improvements was ten times greater than was last year voted to Oregon."

In reference to the matter of demurrage, six days at \$60-\$360, (this should have been \$100 per day), B. says: "There is not a man on that committee that can give an intelligent reason why this item was added except that they wanted to reach the item of four cents per bushel on a ship's cargo."

Booby says "the Middlesex is now at Portland and will load on 1,500 tons wheat before dropping below to finish her cargo," as he is told by somebody. The Middlesex brought down less than 900 ton in her hold, and with this amount on board was detained at the hog's-back twenty-four hours lying aground one tide, and one hundred tons of the cargo had to be removed before she was towed over and down to this port, where she arrived on the evening of the 28th, two days and a half from Portland.

B. further states that "the Middlesex, 1,800 tons register, belongs to that class of larger vessels plying on this side of the Pacific waters of which there are not twenty in the service." The Middlesex is of 1191 tons register, and in looking over a list of thirty ships on the way from New York to San Francisco in June, we find only three are less than 1,000 tons, and twenty-one are of greater tonnage than this monster B. has discovered on the creek, while two of them are over 2,500 tons register.

Again, B. is further informed by an old salt "that it is much to the benefit of a ship to take it into fresh water, as thereby all the salt sea animals and vegetation that attach to the vessels bottoms are killed and fall off." Did old salt tell you it was a good way to kill sea animals to grind them off, on bars under a ship's bottom, tearing the copper off so that when she gets out to

sea again the worms can go right through her? How was it about the Siam? So far as the fresh water matter is concerned, it is the only point B. and "old salt" have raised, that bears any resemblance to an argument, but for the further information of all parties we may say that for four months in the Summer season, and also during the Winter months when the rivers are high, the water is fresh in Astoria harbor, and it is entirely unnecessary for ship masters to invalidate the insurance on their vessels, and take so many extraordinary risks, by passing here for any benefit to "the salt sea animals and vegetation that attach to the vessels bottom."

In his finale B makes some "convincing statements," as he supposed, concerning the number of vessels that have crossed the bar. Ask some one to look over the records for you. Yours for Oregon.

A decision of special interest to the Pacific Coast has been made by General Drummond, Commissioner of the Land Office, who has declared that lands valuable on account of chemical properties may be patented under the Mining act of last year, in the same way as other valuable mineral deposits. The decision of course does not refer to lands specially reserved by act of Congress.

The Mexican Government has received dispatches confirming the report that the famous Lozada had been taken prisoner by the National troops, and that the Tepic revolution is about at an end. The Government is arranging to send 6,000 troops to reinforce the army on the Rio Grande. Minister Mejia declares that he will not support the Government in its dictatorial powers, and he is charged with holding revolutionary caucuses at the house of a son-in-law of the late President Juarez.

-We are glad to hear that Capt. Corno has successfully launched the Mila Bond, and is nearly ready for business again. She will be placed in the Portland and Tillamook trade soon.

Proclamation.

WHEREAS, Under the Act of the Legislative assembly of the State of Oregon, entitled "an Act to protect litigants," approved October 24th, 1870. The TRI-WEEKLY ASTORIAN, a newspaper published at Astoria Clatsop County Oregon, has been designated to publish the legal and judicial advertisements for the county of Clatsop in the State of Oregon.

WHEREAS, The proprietor of said TRI-WEEKLY ASTORIAN has filed with the County Clerk of said county of Clatsop written stipulations accepting the conditions of said Act, together with a bond approved as the law directs, with a proper return and notice thereof to this office, according to law.

Now, therefore, the said TRI-WEEKLY ASTORIAN is hereby proclaimed to be appointed and confirmed as the medium through which all legal and judicial advertisements for the County of Clatsop in the State of Oregon shall be published for the period authorized by law.

In testimony whereof I have hereunto set my hand and caused the seal of the State of Oregon to be affixed, at the Executive office in the city of Salem this twenty-fourth day of July A. D. 1873.

By the Governor, L. F. GROVER. Attest: S. F. CHADWICK, Secretary of State.

To Investors.-The Northern Pacific Railroad Company has now built, equipped and put in operation, nearly 517 miles of its main line of road through an excellent country and along what is known as the Valley Route to the Pacific. The finished portions already enjoy a large and fast increasing traffic. The sections approaching completion connect the chain of Lakes with the navigation of the Upper Missouri and Columbia rivers with Puget Sound, secure at once a large and profitable business and entitle the Company to about 10,000,000 acres of excellent average land in fee simple.

With these accomplished results, the Company offers, and is now rapidly selling, its First Mortgage Bonds, for completing the construction and equipment of its road across the Continent. After careful investigation, we recommend these bonds as a well secured and unusually profitable investment. They have 30 years to run; principal and interest are payable in gold; the interest (seven and three-tenths per cent.) is equal now to about 8 1/2 per cent. in currency. The coupon and registered bonds can be exchanged for each other, at the pleasure of the holder. Gold checks for the semi-annual interest on the registered bonds are mailed to the post office address of the owner.

These securities have the following elements of strength and safety: They are the obligation of a strong corporation; they are also a mortgage on the Road, its right of way, equipments and franchises, and a first lien on its net earnings. In addition to this usually sufficient security, there is pledged for the payment of the principal and interest a Grant of Land, averaging about 23,000 Acres per Mile for the entire length of the Road. At the average price per acre at which other Land Grants have thus far been sold, this real estate security will yield more than \$161,000 per mile-more than three times the possible issue of bonds.

The Company has already begun the process of redeeming and cancelling its first mortgage bonds, as they are now being received, at 110 in payment and exchange for the Company's lands. JAY COOKE & CO., Philadelphia, New York & Washington, Financial Agents N. P. R. & Co.

Beaver Lodge No. 35, I. O. O. F.

Meet every Thursday evening, at 8 o'clock, in the Odd Fellow's Hall, corner of Cass and Jefferson streets, Astoria. Members of the Order are invited to attend. By order, N. G.
