ASTORIA, OREGON:

D. C. IRELAND

MONDAY ...... MAY 15, 1876

#### TEXAS BORDER TROUBLES.

can find and take away. This is probably the plan of these three or four hundred persons spoken of in the late dispatch as Revolutionists, which term applied along the border is nearly equivalent to that of thief and robber combined. The affairs along the border for a long distance are · very unsatisfactory. At any moment our peaceable people in Texas are of growth, of existence, of decay, subject to the incursions of the Mexicans, whether for or against the Revolution, and nothing but a large force of our little army can assure to the people any safety of life and tablished fact that tobacco furproperty.

It certainly appears but poor policy to reduce our small military force article produced. The estimated in the face of discontented and war- consumption of it by the world is like Indians, through much of our western territory, Arizona included, together with the ever present chances and almost certainties of what they call in Mexico pronunciamientos, or revolutions. How long the present so-called revolution, led by Porfirio Diaz, may continue, what it may result in, or when the next one is likely to occur, no one can foretell. It is almost certain that permanent peace along the Rio Grande is he will not soon fail to find an Farm and Stock on Deep almost impossble. And even in appetite for it, a want at least as peace, the condition of our Texas great as the population, and a people along the border, is not much universal market; every decade better than during their neighbor's shows a marked increase in its war times. For unless we have a consumption and a steadily-growlarge force of mounted cavalry sta- ing market demand. The world's tioned along the line, there can be production of tobacco at the presno safety for our people. "Here is a ent day is estimated at 2,600,000,halter and yonder is a tree," says one 000 pounds annually, and notof Walter Scott's characters. Along withstanding the production is so the border of the Rio Grande one might say, there are the thieves and here are the cattle, and the term would pretty accurately describe the condition of that part of Texas. The thieves are plenty just across the river, and the cattle are tempting.

The World's special, speaking of the first day's receipts at the Centenial Exposition, says they have fallen far below the estimate made. From returns from a few turnstiles, actual count of money received, there were not over 80,000 paying visitors admited, bringing the recipts a little beyond \$49,000. The Market street lines carried 60,000; Chestnut and Walnut street lines, 30,000; other lines, 20,000, and altogether 150,000 fares were taken up by the various conductors. Adding to this 75,000 taken to the grounds by the railroad companies, the number present must have reached 225,000 and over.

-- Although it is the opinion of M. Chevalier, as many others of less note as staticians, that the production of silver in Mexico is capable of indefinite expansion, yet so long as the present brigandage and revolution of that country is unsuppressed there is no reason to apprehend a very great supply of silver from any of the Mexican mines. That source will be shut off for some time at least. In the meantime silver quotations in the London market according to the daily press dispatches, show a gradual advance.

-Senator Conklin has presented a petition in Congress against granting au American register to any foreignbuilt vessel.

-Senator Sharon thinks that silver STATIONERY, NOTIONS ETC. should be placed on an equality with gold and made a legal tender to any amount. Sharon and us'uns agree.

No Rest.---Science teaches us that the crust of our earth is perpetually moving, and that the sea is constantly changing. Our globe has its daily rotation on its axis and its yearly rotation about the sun. The sun, with all its satellites, sweeps on toward a movingpoint in the constellation Hercules. Every so-called "fixed star is in motion. Fifty thousand years ago the constellation of the The troubles along our Texan fron- Great Bear, or Dipper, was a startier appear increasing and growing ry cross. One hundred thousand more and more threatening. Banks | years hence the imaginary Dipper of revolutionists gather and threaten will be upside down, and the stars an attack upon a Mexican town, per- which form the bowl and handle haps intending to do as they threaten will have changed places. The but quite as likely the threat and the misty nebulae are also moving, gathering is about as much with the and, beside, are whirling around intention of crossing the river and in great spirals---some one way, making a swoop among the cattle some another. Every molecule ranches and whatever property they of matter in the whole universe is swinging to and fro; every particle of ether which fills space is in jelly-like vibration. Light is one kind of motion, heat another, magnetism another, sound another. Every perception, every thought is but motion of the moleculas of the brain translated by that incomprehensible thing we call "mind." The processes whether in worlds or in the minutest organisms, are but motion.

> TOBACCO CULTURE.—It is an esnishes employment to more people than any other crop raised or 1.312,500 tons, requiring over a million persons to cultivate and prepare for market, and more than 3,000,000 gain a livelihood directly by the world's use of it. The collections from tobacco, for thirteen years, to 1875 inclusive, for the United States Internal Revenue, foots up the sum of \$37,303,-461. No plant is more universally used than tobacco, and the farmer who raises it may expect that immense, it is adulterated before it reaches the consumer to a greater extent than any other agricultural product.

> "IT PAYS TO ADVERGIST."-This is true in every department of business, and no one appreciates, its truth more fully than S. H. Thompson. Some time since he received the Agency, for this county, of the Commischam "Garden City Chi ner Thow," and immediately advertised the same in our paper. Green B. Smith, sa., a patron of the Gazette, saw the advertisement and forthwith rushed to Thompson's and purchased four of these cele-brated plows—which at once have spring into popular favor. No mater how good and valuable an article may be, a merchant or dealer may keep it upon his shelves, or in his store for motths, or even years, and but tew will know anything of i s good qualities, unless he advertises, her years Mr. thompsea carried on basiness here, and spent but little for adverti-ing, within the past two years his business has increased nearly double, and he attributes it to judicious advertising. If you want to thrive in business, ADVERTISE-Cor-
