### The Cause of Hard Times.

An eastern exchange, in puffing a water-wheel says: "It is estimated that turbine water-wheels have, since their invention, saved the country over \$300,000,000 in the one single item of fuel." But the paper does not calculate how many families have been driven to the verge of starvation by those same labor-saving inventions, \$300,000,000 taken from the wood-choppers of the country is a big item, and if the proportion due to this vicinity could be equitably distributed it would relieve the present depression in business. The turbine wheel fellows ought to be compelled to disgorge.

### Klamath River.

The Yreka Journal referring to the Klamath river says:

We cannot see why Klamath river would not afford a profitable enterprise in the salmon canning business, as that stream abounds with this fish. We suppose the difficulty is in getting into the river from Humboldt bay, with vessels for shipping, but a late successful effort by a small steamer, promises to make the stream accessible. The Klamath is the largest stream in California, and carries an immense body of water from the mouth of the Scott river to the coast, and is quite a large stream all through this country up to the Big and Little Klamath lakes, in southern Oregon, which feed it.

From what we know of that river and its tributaries we judge it to be one of the most productive rivers in that line on the coast.

..... The Standard is informed, on what it considers good authority, that the Grangers have notified their stockholders that a meeting will be called to sell their steamers, the S. T. Church, and McMinnville, and close out this branch of their business, and also to attend to other matters which may require their consideration.

..... Brownsville, a town of five or six hundred inhabitants, can boast of more snap and business tact, when it comes to looking after her industries, than many a town of five times her number.

..... Several signs went to pot, and sundry panes of window glass were broken by the fall night before last and yesterday-morning by the storm, which was unprecedented in this latitude. A Chinese wash house sign was found sticking in the mud of Astor street, having been carried nearly a block by the winds, and over the tops of houses.

..... Dement has a splendid article at the City Drug Store for cleansing clothes, gloves, carpets, etc. It is sold in half pint bottles at 25 cents. It is a No. 1 article for what it is recommended, and will save many dollars worth of goods by proper use. Try a sample bottle of it. Call for "cleansing fluid."
