

Nordenskjold.

Some people who are not given to keeping up with the times, have been charitable enough to think that THE ASTORIAN falsified, with respect to the reports of the circumnavigation of the eastern continent by the daring explorer Nordenskjold, "because they have not seen it in any other paper".

Mechanics Institute Fair.

The fourteenth exhibition of the San Francisco Mechanics Institute will open on Tuesday August 5th, and close September 6th, 1879.

The great overland excursion of fifteen or twenty thousand persons that is coming from the eastern states to meet Gen. Grant on his arrival in San Francisco will, no doubt, induce an unusual number of the people of this coast to visit the city at that time;

No charge of any kind is made to exhibitors for space or a reasonable amount of power. Goods arriving before the opening of the exhibition will be stored free of charge.

A Powerful Weapon.

The Boston Traveler, in speaking of the death of William Lloyd Garrison, says: "More than twenty-five years ago a little boy, not yet in his teens, took his first lesson in the 'art mystery' of printing from a gentleman in middle life, who explained how the 'case' was arranged and why, and practically exemplified the process of 'setting up' type.

The managers of the land company now holding the fraudulent grant of the Oregon Central military road company are making another effort in congress to obtain a valuable gift of land without any compensation whatever.

Earthquakes Last Year.

The earthquakes of the world in 1878 amounted to 103, and were most numerous in winter and autumn, only 19 being numbered in the spring and summer, while there were 36 in winter and 26 in autumn.

Dimensions of Heaven.

And he measured the city with the reed, twelve thousand furlongs. The length and breadth, and the height of it are equal.—Rev. xxi. 16.

Twelve thousand furlongs, 7,920,000 feet, which being cubed, 595,793,088,000,000,000 cubic feet. Half of this we will reserve for the throne of God and the court of heaven, and half the balance for streets, leaving a remainder of 124,198,272,000,000,000,000 cubic feet.

We will now suppose the world always did and always will contain 990,000,000 inhabitants, and that a generation lasts 39 1/2 years, making in all 2,970,000,000 every century, and that the world will stand 100,000 years or 1000 centuries, making in all 2,970,000,000,000 inhabitants.

Gold Coin to Europe.

The steamer Algeria from New York for Liverpool June 5th, took \$250,000 in gold coin. This is the largest shipment this year and is unaccountable. Now that bond sales have been practically closed, it is not unlikely that there will be more demand for the gold coin in the United States treasury.

NEW ADVERTISEMENTS.

Lost.—On Wednesday night, June 11th, about 175 fathom of net, floats and leads branded J. HUME. The finder will be rewarded on leaving the same at my cannery, Knapppton, or on board steamer Quaker, J. HUME.
