

The Daily Astorian. ASTORIA OREGON: SUNDAY, MAY 15, 1881. D. C. IRELAND, Editor.

Eastern Railroad Connections. A correspondent of the Chicago Inter-Ocean writing from Omaha, the headquarters of the Union Pacific operations, says the most important event in railroad extension, excepting only the completion of the new southern line to the Pacific coast, is the grand system of railroad development in Oregon and Washington territory.

Flushes from the Wires. BY MAIL AND TELEGRAPH. The California assembly since died on the 13th.

Mrs. Garfield is worse, and the president's entire attention is given to her, so that nothing can be learned from him about public matters.

On the 13th the electric railroad which runs six miles from Berlin, was an entire success. It was made in a simple train of cars with an electric battery concealed between the wheels.

The New York Herald is giving the stalwarts' side a show. The Oregonian publishes a very considerable portion of this matter in its dispatches yesterday, and 'though it is characterized as a "disgusting string of falsehoods," it is nevertheless about as reasonable as anything that has appeared on the other side.

The Oakland Times, a republican paper, says: "There is a fair prospect that the state tax will be about twenty-five per cent. higher than usual, on account of sickness and the extravagant items that had to be allowed in order to secure votes for the debris interest."

The worlds fair is convalescing. Now we are informed that the commissioners are encouraged by the more friendly disposition of the railroad companies. Vanderbilt will subscribe \$2,000,000 or \$3,000,000 for the Central railroad.

Granted a few resolute conspirators, with one man of education among them, and some little command of money, and no conceivable laws or rules of police or detective arrangements, can prevent assassins from making and carrying and throwing bombs, which are as dangerous to the victims as hostile batteries only fifty yards off.
