The time has long since passed when he sobers when mechanical trades provided our some with a living. Labor-saving machinery, patent tools and steam have robbed the trade of the future it offered to our boys in the days of the indentured apprentice system. The idlers and do nothings of our metropolitan cities are composed largely of tradesmen and professional men, and merchandising is a failure, if the number of bankrupt merchants who had to succumb to the pressure of the times can be taken as a criterion. Whathe country needs is producers, and the waste fields of uncultivated land offers an opportunity to place the rising generation in the way of making somes for themselves and better times for posterity.
