The cruise of the ship Ferret is likely to be memorable in the annals of crime. It is the first vessel Walker and the rathroad company is not certainly known, but it is believed that at most he made only small partial payment and gave worthless papers for the balance lue. A new crew was shipped at Cardiff, and the Ferret sailed from Milford Haven the 1st of last November. The course was kept antil the vessel had passed through he straits of Gibraltar. Then in the night the ship, was brought to; the funnel, previously white, was painted black; and the boats, instead of blue, became suddenly changed. The Ferret touched at Cape Verde November 21st and took in stores, for which fraudulent paper was ships name was changed to The Benton. At Santos the swindlers King of the Blood obtained on false pretenses a cargo of coffee for Marseilles. They sold it at Cape Town for \$75,000; again brought out the paint pot, changed the ships name to The India, and sailed away to Mauritius. Here the steamer was docked and repaired, and the shipwright paid in another false bill. Melbourne was the next stopping place and the last. It was reached in April, 1881. By this time the exploits of the disguised Ferret had been heralded far and wide by electric telegraph, and lynx eves were on the watch for her. The swindlers and the invalid Mrs. Smith were captured and jailed. The crew, who have been held innocent of connivance in the frauds, and who lost their wages for the trip, were eager to bear testimony against the principals, though it does not appear that they informed the authorities of the singular operations of the Ferret. The moral that the London Times draws from the whole adventure is

The Countess his wife, was prostrated by an intermit tent fever, from which she was freed by tent fever, from which she was freed by the use of the native remedy, the Peru-vian bark, or, as it was called in the language of the country, "Quinquina." Many persons abuse this delicate and beautiful ornament by burning it with alcoholic washes and plastering it with grease, which has no affinity for the skin, and is not absorbed. Burnetts Cocoaine, a compound Cocoanut oil, etc., is unrivalled as a dressing for the hair—is readily absorbed, and is peculiarly adapted to its various conditions, pre-venting its falling off and promoting its healthy growth. Housekeepers should insist upon ob-taining Burnetts Playering Extracts, for they are the best.
