The Standard says that the reason Portland does not improve its water outlet to the sea is because the bars between there and the mouth of the Columbia would be so many defenses against a hostile fleet capturing Oregon's metropolis.

The contract for furnishing the Walla Walla Court house was let to a Portland firm, and the Statesman complains that business men who have been paying taxes for the past twenty-five years in that county are left out in the cold, although one bid from a firm there was \$500 less than the Portland firm.

The Darwinian Creed.

I believe in a chaotic, nebular, self-existent evolver of heaven and earth; and in the differentiation of the original homogeneous mass; its first begotten product which was self-formed into land and water, self-organized into plants and animals, reproduced in like species, further developed into higher orders, and ultimately refined, rationalized and perfected in man; he descended from the monkey, ascended to the philosopher, and sitteth down in the rights and customs of civilization, under the laws of a developing sociology; from thence he shall come again by the disintegration of the heterogenized cosmos, back into the original homogeneousness of chaos. I believe in the wholly impersonal absolute, the disunion of the saints, the survival of the fittest, the persistence of force, the dispersion of the body, and in death everlasting.

Service at the Episcopal church this morning at 11 o'clock; Bishop Morris officiating.

The following is the estimate of the area of coal lands which yet remain the property of the United States: Washington Territory, 825,090; Oregon, 414,535; California, 246,020; Colorado, 1,127,625; Utah, 2,762,620; New Mexico, 10,000.

The Albany Register says that the appropriation for the work on the bar at Yaquina bay is about expended, and if contributions are not received soon the work will necessarily have to be stopped until another appropriation can be secured, and at present this seems a long way in the future.

"Just as Good."—One of my friends who had been using Fellows' Compound Syrup of Hypophosphites for Consumption, was induced by one of our druggists to take another preparation of Hypophosphites, which, he said, was "just as good, if not better." The use of half a bottle taught him that, if he would consult his safety, he must return to your syrup again.—GROGAN C. FOSTER, Madison-House Hotel, Baltimore, Md.

A San Francisco dispatch of the 7th says: The American ship Dakota was chartered to-day to load wheat at Tacoma at 90c. U. K. She came to Tacoma with railroad iron, and will load there because the freight charge from Portland to Tacoma on her cargo will be less than the cost of taking in and discharging ballast, which would be necessary if she came to the Columbia river to load. Two or three other vessels now on the way to Tacoma with railroad iron will probably load in the same way. Comment on the above is needless.

Speaking of the wheat market the Oregonian says that \$1 62 1/2 per cental may be fairly quoted as the top of the market for valley wheat, and Walla Walla at 60 cents per bushel to the farmer, besides sacks, at the different points in eastern Oregon where there can be an assured early delivery. In freights, nothing new has developed during the week except that the fears of a full market value in Europe, coupled with the high figure for wheat here, has restrained any chartering on the basis of asking rates for ships due or about due; and it is doubtful whether an iron ship would now command above 90 shillings to U. K., and wooden at 87s 6d, although higher rates are asked. It is hoped that the greed of shipowners will be appeased on the basis of current offerings.

Bethel Service. There will be divine service on board the Derbyshire at the Farmers' wharf to-day, at 2 o'clock P. M., and at upper Astoria at 6 P. M., Rev. J. McCormac officiating.

M. E. Social. A social for the benefit of the new M. E. church was given at the residence of Mr. C. Brown last Friday evening, and was one of the finest of the kind ever given in Astoria. The evening was spent in recitations by Dr. A. C. Kinney, F. D. Winton and Miss Brown, interspersed with instrumental music, singing and games by the young folks. Great praise

must be tendered to Mrs. C. Brown, Mrs. Dr. Kinney and Mrs. Elberson for their success in pleasing all the guests. Quite a sum was netted for the church. The following ladies and gentlemen were present: Mr. and Mrs. Dr. A. C. New M. E. Church.

The church which the Methodist Episcopal congregation are building on Jefferson street is evidently perfect in its conception and when completed will be admired for its neatness, convenience and beauty. The church extension society of that church did a wise thing when they began to furnish architectural plans for cheap churches. For besides being superior in most cases to the designs of local architects, they can be obtained at a nominal cost. This denomination are said to build about four hundred churches a year, about one-half of which are built according to these plans. This is a neat plain church 32x55, 16 feet posts, raised ceiling, giving twenty feet six inches in the center, gallery across the front end, with vestibule in the center and class room at each side, communicating with the audience room by folding doors, making all the room available and giving good accommodations for the Sunday school. The entrance doors will open outward, which is an excellent arrangement in case of fire and should be adopted for all public buildings. The doors and windows are gothic style, and in each end near the ceiling is a circular window, hung on pivots, which will help the ventilation. The inside appearance will probably surpass the outside. Underneath the floor of the church is a room 12x32 feet, the purpose of which the builder is often asked to explain. Some think it must be a baptistry. But a portable furnace is to be put in that room for heating the room, which will be the only one in the city thus heated, and the advantages of this mode are so manifest that they need no mention. Jackins & Montgomery will put in the furnace as soon as they can get it here. Suffice it to say that the contractors are doing excellent work and, in the judgment of the building committee, are striving to carry out the true intent and meaning of the plans.

Take Notice. On after this date an additional 10 cents per cord will be charged on all orders for sawed wood not accompanied by the cash, at Gray's wood yard, July 14, 1881.

New Millinery Establishment. Mrs. E. S. Warren opens to-day a new and complete stock of millinery at her establishment, corner Cass and Jefferson streets.
