### Meeting at Portland.

At a meeting held at Portland last forecastle head and lead going; Point Tuesday evening to discuss the mat-Adams, (as I supposed,) being hazy, ter of river improvements. Mayor Thompson said that Government engineers estimate that 116,000 yards of deposit is to be removed next year bewaiting, as I supposed, for our aptween Portland and Astoria to secure proach, I stood for the buoy. When a channel one, hundred feet wide and abreast, wind falling light, and the twenty feet deep, and that the work weather thick, I anchored with port could be done in 96 days. He furanchor in 8 fathoms, and vecred chain ther stated that it was the disposition to 45 fathoms at 1 P. M. At 2:30 P.M. of the city council to levy a tax, and the sea rising, the chain parted; it had the express authority for such made sail with all speed and endeavaction.

George, in a speech concernwind hanling more, ship would ing the improvement of navigable not weather the point and water waters between Portland and the shoaling to three fathous I let go ocean, favored the use of both plans starboard anchor and veered chain, suggested by engineers, viz: permawhen ship took the ground and nent improvement by dikes and deep ening channel by dredging. He bemizzen mast to ease the ship and lieved that the restoration of the again vecred chain to harden her on south bank of the Columbia river at the sand and prevent the heavy its mouth by artificial means, so that bumping. Sounded pumps and found it would have the form indicated by I foot 7 inches in well." Capt. Payn surveys of 1841, would of necessity thinks he can get his ship off without secure a more direct and deeper channel to sea. He suggests that the Board of Trade send a representative to Washington during the next ses Talking about taxing Church propsion of Congress, whose special business should be to lay the matter of river improvement before the committee on commerce, and arge suffibeen said to me that churches are cient appropriations. A committee of three was appointed to confer with the council in reference to the tax levy required.

Hogwash. The ship Fern Glen, and not the Eilen Lorne, as was first reported by telegram, was wrecked on the Columbia bar by the captain standing so far and swept her upon the Clatsop spit. In four hours there was nothing left of her. Had the monopoly pilots been outside of Cape Hancock, instead of playing bill-cards in Astoria, the loss of the vessel and cargo might have been avoided. - Idaho Statesana

This is reproduced as a specimen of the truck that some of those fellows up the country peddie around. All who are familiar with the history detailed by Captain Bubb of the lost ship, as given by us at the time, will remember how warmly and grateful he spoke of the unsuccessful efforts made by the pilots to rescae him from a position in which his own ignorance of our coast had placed him.

Oh wad some power the giftee gie us, To see ourselves as ithers see us. It wad fra mony a blunder free us And foolish notion."

### Card of Thanks.

The following, clipped from the

Oregonian, is self-explanatory; I desire to publicly thank the many shipmasters in port, the merchants of Portland and river men generally, also the citizens of Astoria, for their very liberal and substantial assistance same size as the Baron Aberdare to myself, a shipwrecked stranger in their midst. Their generosity has large as the American ship Samuel placed me under obligations which I can never repay and which I can find Watts, which loaded at Astoria about no words to suitably acknowledge.

Master of the wrecked bark Fernglen.
