COEXTENSIVE with the increase of electric cables, and the wonderful extensions of the telegraph, the telephone and the electric light, is the demand for skilled Steamer Clara Parker electricians. When it is remembered that eight cables underlie the ocean, that they travel the Per- On SUNDAY. AT 9 A. According to Mr. Green, of New York, women as well as men are eligible to positions as electricians. The work is not one requiring physical strength, but rather keen abilities and good mathematical and scientific training, to which is, of course, superadded the necessary special education.

THERE has been a reduction of ten per cent. in the wages at many of the cotton and woolen mills east, and if the tariff were raised a little higher, wages would doubtless fall again. The greed of the mill lords knows no bounds; the more they get from the country in the way of protective legislation, the meaner they become with their operatives. Thousands of women and girls who must toil every day to earn money to pay for their food, cannot resist by means of a strike; their slavery seems to be almost hopeless.

It is situated on Lewis and Clark's haver, 7 miles south of Asteria, and 25 miles from Clatsop beach. There is a good steamboat landing which is accessible to any of the O. R. & N. Co's river steamboats. About half of the 700 acres is tole land, well bridged, on which cattle keep fat the year round. The other half, level timber land, and about 200 acres in tame grass. Thousands of cords of hemotock, fir and spruce can be cut, worth two dollars and a half at the hadding to which there is a good wagon road from all points. Every cord cut finds a ready market. In addition, there is any quantity of mill lumber and good piles. Good dwelling house, barn, and necessary outhouses, with an orchard of 10 or 12 acres, containing almost all kinds of fruit bearing trees, etc. etc. This desirable praperty has a frontage of two nules on the river bank, and is admirably adapted for settlement by a company desiring to colonize, as it is large enough to divide into several farms and homesteads.
