The Queen of the Pacific arrived in yesterday afternoon. The State goes to sea this morning.

Lieut. Com. Geo. Davis assumes charge of the thirteenth light house district, vice Capt. Geo. C. Reiter, former inspector.

Wet weather delays the work on the Odd Fellows' building. Bricklaying cannot go on very lively in such showers as we've been having.

The Coast Mail says the old Escort is expected there in about two weeks. She has been overhauled lately and fixed up in good shape for several years.

From nearly every point up the river comes the same complaint "we don't get our paper regularly." It's just like swearing at the comet for us to make any complaint about this thing.

Cape Hancock Record. October 12, 1882. Weather rainy and thick, bar rough, wind S. S. W.

Mass Meeting. There will be a mass meeting of the citizens of Clatsop county at the court house at half past seven this evening.

Y. M. C. A. Regular business meeting this Friday evening, at half past seven o'clock.

Look Here. Gustav Hansen, the jeweler, goes to San Francisco on today's steamer.

Closing out Business. Owing to the illness of Mr. N. Lock, he has concluded to dispose of his entire stock of clothing, furnishing goods, groceries, etc.

Without mineral water, fresh and sparkling, at F. B. Elberson's. That taffy of Oerkwitz's is the boss confection, and don't you forget it.

Prof. J. F. Meyer wishes to inform the public and his pupils that he is now settled and intends remaining here.

If you want nice fresh lard, or good sugar-cured hams, just from the country go to F. B. Elberson's bakery.

A Journalist's Views

Among the passengers on the Queen of the Pacific yesterday were Samuel Bowles the manager of the Springfield Republican and the son of the Samuel Bowles who made that paper one of the foremost journals of the United States.

Then your visit is not for the purpose of making or putting into execution new plans and combinations? "Not as far as I know. Our main desire is to learn the country, and then you know the Northern Pacific has the whole field to itself.

Have not the business and the standing of the Union Pacific been affected by the operations of the North Pacific? "I can hardly answer that but I do not believe that it has.

RECAPITULATION. Total alarms..... 17. Damages..... \$1,425.00. Insurance paid..... \$625.00.

FIRE APPARATUS OF THE CITY. I find the same as reported by my predecessor with the exception of 50 feet of hose burned by Rescue Engine No. 2, leaving as follows: Property in hands of A. E. Co. No. 1: 1 2d class Amoskeag engine in good order; 1 hose carriage in good order; 1 heater in good order; 650 feet hose on cart in good order; 150 feet hose on rack in good order; 300 feet in shed in poor order.

Property in the hands of R. E. Co. No. 2: 1 3d class Sibley engine needing some repairs; 1 hose cart in good order; 1000 feet hose in good order; 240 feet hose in poor order; 1 heater in good order.

Property in the hands of A. H. and L. Co. No. 1: 1 truck complete, as reported on last year, with all in fair condition, that is I consider some repairs necessary to consider it first class.

Regarding the property or rooms used by the various companies I find they are well kept and cared for.

RECOMMENDATIONS. I would recommend that the city purchase at least 500 feet of hose to be divided between the two engine companies so as to give them an equal amount. In my opinion 1000 feet could be used for the following reasons:

First, the city is building larger buildings, and building them farther back from the river all the time. There are traps or places along streets to allow the engines to take water; but this can only be done when the tide is in.

In the event of a fire (with an engine stationed at one of these places) requiring any length of service, they would be compelled to take up and go to some dock. Second, the docks, or most of them, cannot be depended upon, as they are often blocked so that an engine cannot get to the front without a great deal of trouble and loss of time.

I would recommend that the city have three or four cisterns built in different parts of the town. And those that could not be so arranged as to fill with the tide, instruct the Chief engineer to have the engines refill them from the river, as often as required.

The Department is well manned and ever on the alert; and with a fair chance, I consider Astoria pretty well guarded from fire.
