

The Daily Astorian

ASTORIA, OREGON:

FRIDAY.....MARCH 30, 1883

There have been four deaths in Weston from small pox.

The Statesman thinks that water-works in the capital would be a paying investment.

M. J. Kinney arrives home from San Jose, Cal., this morning.

J. O. Bozorth, clerk district No. 1, advertises for proposals for building a schoolhouse.

Councilman Cooper, and F. C. Young, formerly of the I. X. L. are on the incoming steamer.

The Columbia is due this morning from San Francisco. She brings over 200 cabin passengers.

Portland waterworks are to be enlarged to an additional capacity of half a million gallons daily.

Mrs. Potts is nightly lecturing to crowded houses. Her subject to-night is the circulation of the blood.

Fire brick and retorts for the gas works are being towed around from Main street to the site of location.

The barkentine Tam O'Shanter arrived yesterday morning, seventy-two hours from San Francisco. Good time.

The parsimonious forty-seventh congress compelled a curtailment of the signal service, which is now going into effect.

The Fleetwood left Portland at 6 o'clock yesterday morning, made nine-teen landings and blew her whistle here at 12:59.

The News learns that Gill & McCabe have put in a fish trap just above Clifton, at a cost of \$800, and will dispose of their fish to J. W. & V. Cook.

The Melancthon is unloading hay at Flavel's dock. She has nearly 500 tons cannery supplies which will be put off on the upper dock in Coleman's warehouse.

The adv. of the New York novelty store appears this morning. There is a large and handsome display of goods, and the prices are commensurate with the quality.

The News says the Bush electric light is an assured fact, so far as Portland is concerned. Nearly 100 lights have been contracted for in the business portion of the city.

The Liquor Dealers Union had a full meeting yesterday. It is understood that they will stand pat, and test the validity of the new license ordinance.—Standard 29.

The Chehalis Tidette announces a great rush of immigration to that country. It is a splendid country and has a zealous champion in the enterprising newspaper at Montesano.

M. D. Kant and wife are on the outgoing steamer to-day, for a visit to southern California. Mrs. Kant has been very sick for the last three months, and it is hoped the change may prove beneficial.

Aug. C. Kinney, W. S. Kinney and L. C. Kinney filed articles yesterday with the county clerk incorporating the Clatsop Lumbering Co. The new company will take possession of the Hame saw mill on next Monday.

Hon. M. C. George and mother are on the incoming steamer this morning. Mr. George is the only member of the congress of the United States that is obliged to travel by sea on his way to and from the national capital.

Seldom has there been a quicker trip, or neater run in these northern waters than that made by the Tam O'Shanter, which arrived in yesterday morning—sixty-five hours from San Francisco to the bar. This is better than the steamship time of a few years ago.

During the year 1880, 755,883 persons died in the United States. The death rate was about 15 to the thousand. Were all parts of the union as healthy as Oregon and Washington Territory the death rate would be only one-seventh, what it is. But perhaps it is just as well.

At the annual meeting of the Portland Seaman's friend society, according to the Standard, Chaplain Stubbs made favorable mention of the bethel work at Astoria among fishermen, seamen and others by Rev. J. McCormac. He says a home and bethel are greatly needed here to contract in some measure the evils practiced on seamen by wicked people in this city.

The captain of the schooner Rare Plant, which arrived at Liverpool February 1st from St. John's, with a cargo of seal oil, reports having encountered severe weather. During a terrific gale on January 16th, he filled a large canvas bag with seal oil and towed it astern of the vessel, which was running before the wind. It had the effect of rendering the waves almost powerless, and to this precaution the captain attributes the safety of his vessel.

Labor Saving Machine.

Our Astoria machine shops are busy turning out first-class work. At Arndt & Ferhens over four hundred iron crates for holding cooking salmon are being made. At the Astoria Iron Works there is a large crowd of busy workers in the foundry, machine and boiler shops. In one apartment we found men setting up some ingenious contrivances for canning salmon. In these machines the salmon slides down a sort of trough, at the bottom of which a knife slices off just enough to fill a can which is on a lateral spindle to the left. As the knife cuts the fish a solid punch a little less in diameter than the can drives the quantum sufficient of fish into the can, and the work goes on. About twenty of these machines are now building. They are a success. With two or three chisamen to keep it from running away with the fish in its mouth, one of these can-fillers will do as much in a day as twenty men in the old fashion. They cost about \$800 apiece and are marvels of ingenious mechanism.

The Occidental.

A busy little group were arranging the scenes in the skating rink yesterday, which place in a few days will be transformed into "Occidental Hall." The scenery looks well, works well, and is, we believe, as fine as any theater north of San Francisco, can show. There are nine sets, and the artist did his work faithfully. The seats are expected on to-day's steamer, and on next Thursday the public will have an opportunity of judging for themselves as to the merits of the new theater. On that date the Kentucky Jubilee Singers will appear and have the honor of giving the inaugural performance.

The Willamette has been put on as a freight boat between San Francisco and the Columbia, to relieve the present pressure of the northward traffic.

Mrs. Malcolm advertises a fine stock of spring millinery which will in style and prices suit the ladies who contemplate a purchase. She goes to San Francisco on to-morrow's steamer.

The Imperial arrived in yesterday evening and anchored in the stream. The American ship Harry Morse, Murphy master, which sailed from New York at seventeen minutes to four on the afternoon of November 2nd, 1882, came in and anchored off Sand Island.

An Oregonian reporter learns from Captain Powell that at Yaquina Bay the channel has moved to the north, and is now nearly at the center of the entrance, where there are no rocks as a menace. The depth over the bar at mean high tide is 17 1/2 feet. At the mouth of the Coquille work has been suspended on account of the near exhaustion of the funds appropriated.

The Astoria teachers association will hold its regular meeting at the Main street school building, this afternoon at two o'clock. The following are subjects chosen for discussion: Graded schools and the greatest needs of our schools. An invitation is extended to all patrons of the school, and friends of education generally, to attend and take part in the discussion.

Dr. Pierce's "Favorite Prescription" is the debilitated woman's best restorative tonic.

The funeral of the late C. H. Nicholson was largely attended, and accompanied from the hospital by the band playing the Dead March in Saul, Prof. Smith, leader. The expense was defrayed by public subscriptions collected by Jas. Smith, of the Variety Chop House, who returns thanks to all donors.

THE LOST CHILD.

A FATE WORSE THAN ABDUCTION.

How Parents, by a Lack of Precaution and Care, are Responsible for the Death of Their Children.

(Camden, Me., Herald.)

The moral and legal responsibility of parents, in the care of their children is, fortunately, attracting the serious attention of the better portion of the entire country. The many instances of child beating, oppression, and other forms of cruelty which have come to light, demand that something be done; and it is gratifying to know that the people are becoming thoroughly aroused. Whether the cruelty be in the form of physical violence or physical neglect matters not—the principle in both cases is the same. The man or woman who neglects his or her own health may be pardoned, as the consequences fall upon the individual alone; but the parent or guardian who permits the inroads of disease upon the innocent ones dependent upon him for protection, is criminally liable in the sight of God, however, he may appear in the eyes of men. There are, however, parents that intend to care for their children, but, who through carelessness or the urgency of other duties, permit them to become the innocent victims of disease. Such parents may be guilty of intentional wrong, but the disastrous results upon their children are just as great.

These are truths which must be manifest to every worthy parent and especially in a vicinity where the unknown effects of the atmosphere, the malarial and general tendency to malaria are so great. There are many families in this locality who have been called upon to mourn untimely losses, even when the greatest care was exercised; but the experience of one only will be given: It is that of the late W. O. Thomas. The children were all most promising, but for some unexplained reason their health and strength seemed to gradually lessen until their friends feared they were the victims of consumption. One by one, they sickened and died until three had departed and two of the surviving brothers were also taken ill. Their names were Hermon and Edward. Hermon, however, seemed the stronger of the two; and while his younger brother was confined to the house constantly, and to his bed much of the time, Hermon was able to be about in so weak a condition that he had no desire to play. Eddie's symptoms were terrible! He found difficulty in retaining food upon his stomach, was restless and irritable, and out of his head frequently. At various times three different physicians visited him; and each one told his friends he could not live. He finally got so low that death was only considered a matter of a few days. At that critical time his elder brother, aroused almost to the pitch of desperation by the three deaths that had so recently occurred, and the other one standing in the face, resolved to take the case into their own hands. They accordingly did so, and secured a remedy that was then being universally used, and began giving it to him. His condition was slight, but any improvement was considered a good symptom. By degrees his strength returned; he was able to eat with a relish, then was about the house; and finally he regained complete health and strength. The boy was so rejoiced over his recovery that, accompanied by the editor of this paper, he went before Justice Charles K. Miller and made oath to the facts of his sickness as above related, and that he was restored to perfect health by the use of Warner's Safe Kidney and Liver Cure.

Now, Edward Thomas's parents, while they lived, undoubtedly, provided faithfully for the wants of all their children; and yet the seeds of disease had taken deep root. Their care in one direction had been counteracted by unknown carelessness in another. Their love was sincere, but wholly misdirected. They should have known that children are just as liable to kidney and liver diseases as grown up people; and that the fatality of Bright's disease of the kidneys is just as great among children as with adults. This is a serious subject. Hereditary traits: the after consequences of measles and scarlet fever, diphtheria and the passing troubles which so easily become chronic, all demand the greatest care and caution. No case of cholera infantum, measles, scarletina, or diphtheria was ever violent when the child's kidneys and liver were healthy. It would simply be an impossibility. These important organs of the body are just forming within the child, and growing with its growth; and they can be trained to truth and uprightness.

The importance of carefully watching the slightest frosts of the child's kidneys and liver cannot be too strongly emphasized. Children respond so readily to the proper remedies and are so sensitive to disease, that it is in a deprive them of one at the risk of incurring the other. By a judicious treatment these essential organs can be developed so that a strong constitution is the result. The inroads of disease through coming years, shall be the result.

Useful in the Family.

We usually leave it to Doctors to recommend medicines, but Parker's Ginger Tonic has been so useful in our family in relieving sickness and suffering that we cannot say too much in its praise.—Salem Argus.

Why Do People Have Two sets of teeth.

They don't shear arms and legs to get new ones. Teeth are indispensable, and the Creator gives two chances. When one uses SOZODONT, even among babies, it preserves the "deciduous teeth," and helps to strengthen the permanent.

Wiggins' Great Storm. It seems as though the great storm predicted by Wiggins, is going to strike Astoria. During the last week, at least seventeen young, good-looking, marriageable men have been at A. M. Johnson's Crockery Store, inspecting their stock and prices with a view of getting ready for housekeeping. If a storm is not in transit towards Astoria, a squall is, at least, and the young ladies and gentlemen are going to be crowded into this year it seems. How they are going to do it is a question, but they'll do it no doubt.
