Insurance.—The board and non-board fire insurance companies doing business on this coast have at last buried the batchet (with the handle left conveniently sticking out of the ground) and are just at present smoking the pipe of peace, or words to that effect. Sometime ago the local agents in some city far, far sway, concluded that they might as well. away, concluded that they might as well stop giving away their legitimate profits and so "pooled their issues." The idea worked so well that it was rapidly adopted in other cities, and finally the magnates of the several companies did jointly agree upon a "uniform" system of rates that shall henceforth be charged. A mana er has been as pointed for O agon and washington, air. Alfred Still-man, whose headquarters are and shall han, whose headquarters are and small be in Portland. A compact has been prepared and signed by the accredited rep-resentatives of the several companies in San Francisco and elsewhere, which im-poses divers pains and penalties for its violation. No agent of any insurance company so bound can take any risks not in street accordance with the letin strict accordance with the let-ter and spirit of the aforesaid compact. An exact record of all insurance business transacted in Astoria shall be promptly transmitted to Mr. Still-man in Portland and not to San Francisco as heretofore. Our city has been rated and ruled and districted in sun-dry pleasant looking volumes, with the rate to be charged on each building in the city and upon the contents in such building. These rates bear some resemblance to rates heretofore charged, and are apparently of a character sufficiently steep to afford a handsome profit on the business. At all events it is allowed to the insured to suppose that whatever additional expense may be incurred by the salary, etc., of the manager will not come out of the exchequer of the companies. The rates run from 1½ to 12 per come out of the excheduer of the com-panies. The rates run from 1½ to 12 per cent. While recognizing the usual per-centage in favor of the game, it is mani-fest that insuring property in Astoria is very profitable to—the companies. Were the city to have a big fire to-morrow the companies could and doubtless would draw out considerably ahead of the game and play on velvet elsewhere with their winnings.

QUICK TIME.-Attention is directed to the new ad. of the Flectwood on this page. Her quick time between the chief cities of Oregon is in itself a splendid advertisement, and since her late improvement and renovation that popular boat is the admiration of all travelers who appreciate speedy transit and cour teeus treatment. With a view to mak-ing still faster time between the two cities Capt. Scott advertises that after to-day freight will not be taken for way ports, which will enable the boat to make the through trip in time hitherto unequaled on the Columbia river.

IMPROVING THE COLUMBIA BAR.

A Letter from Congressman George.

The following letter from Hon. M. C. George was read at the last meeting of the Astoria chamber of commerce. E. C. Holden, Esq., Secretary of Astoria Chamber of Commerce:

Chamber of Commerce:

I have the honor to acknowledge the receipt of memorial for a special appropriation to improve the mouth of the Columbia river, and take pleasure in stating that I presented the same to-day and had it referred to the appropriate committee, and shall do all in my power to secure an appropriation therefor.

As you are probably aware I have already introduced a bill appropriating \$500,000 for the commencement of the permanent improvement of the mouth of the Columbia river. And while upon this subject I take occasion to return my

the Columbia river. And while upon this subject I take occasion to return my thanks to your honorable chamber of commerce for the kind request to the speaker of the house of representatives asking my reappointment to the committee on commerce. After the preparation of the petition, and before it was presented to the speaker, the house had divided the jurisdiction of the old committee on commerce, constituting a new tee on commerce, constituting a new committee, having special authority over rivers and narbors. It was signified to the speaker that it undoubtedly was your intention that I should be assigned to that particular branch of the work of the that particular branch of the work of the committee on commerce. It was urged that as the former speaker had given to the Pacific coast two members and the chairman of the committee on composed of fifteen members, the new speaker could do no less than to allow us at least two members of the new committee—one from California, as before, and the other from Oregon. Of course, I was the only one from our northwest section the only one from our northwest section

the only one from our northwest section that could possibly go upon that committee, and having been upon it, my claim was all the greater.

While the speaker has personally treat ed me with regard by assigning me to the important committee on Indian affairs, and to the committee on the rerival of American ship-building and shipowning interests, it does not seem that he has given our section of the country proper representation upon this important proper representation upon this important

I no longer occupy the position which enabled me to more effectually represent the interests of our common state. It will be remembered that while I was a member of the committee on commerce during the first session of the 47th con-gress, the intiatory steps were taken by our committee that originated the river and harbor bill, looking toward the com-miscement of a permanent improvement at the mouth of the Columbia.
