ABOUT THE CITY.

The *Imperial*, *Little Bell* and *Harry Butler* have arrived out.

The *A. E. Field* has a full load this morning for Gray's harbor.

The *Field* will start for Gray's Harbor to-day, weather permitting.

Gracie Lodge No. 17, K. of P., will give a grand ball on the 23d inst.

Thursday evening is now the regular meeting time of the I. O. G. T.

Olive growers seem to be the correct thing in planting exteriors this season.

The spring term of school begins at the Upper Astoria school house to-morrow.

The *Columbia* is due from San Francisco this morning. The *State* sails to-day.

Arnold & Ferben were connected with the central office by telephone last evening. Their number is 32. King 'em up.

Astoria Lodge, No. 40, I. O. G. T., will meet next Monday, May 12th, on account of the hall being engaged for the 9th.

John Myers, the Democratic candidate for congress, will speak at Astoria next Friday. Binger Herman, the Republican nominee, will speak here on the 30th inst.

The *Oliver S. Southard* will light 800 tons before she can float down to Astoria. When will Portland learn that deep-sea-going vessels cannot slip through the mud?

There is considerable building being done. The probability is that '84 will see a great many new houses built, as the cost of labor and construction is less than it was in '83 or '82.

Francis de Xavier, the great Catholic missionary and companion of Loyola, is the character chosen as the subject of a lecture by Rev. St. Ignace at the Baptist church to-night.

Capt. M. Rogers and family have moved into their new residence near the school house, from the house corner Cass and Jefferson streets which they have occupied for the last twenty years.

Meeting at the Y. M. C. A. rooms this afternoon at 3:45. Song service from Moody and Sankey's gospel hymns. Capt. N. Ingersoll, of Portland, Y. M. C. A., is expected to conduct the services.

Andrew Carlson, whom Clark Longhrey arrested last week for being connected with the recent burglaries, was yesterday given a preliminary examination and bound over in the sum of \$1,000 to appear before the grand jury.

But little moved on the face of the waters yesterday beyond the flying scud and the swiftly moving west wind. The whistle of the breeze and the dash of the water caused the boats to cut a white wake, and with the exception of the *Gipsy*, which scudded northward, nothing went to sea.

A fisherman that came up from Sand Island last evening reports that yesterday morning two boats were caught in breakers in that vicinity and swamped, that one crew were saved and the other two were drowned, both boats coming ashore on Sand Island.

Two men were lost belonging to the *Sodanivian* Packing company, but up to an early hour this morning the report was unconfirmed.

Over some February let there has been a difference between Wm. T. Coleman and several Astoria canneries for whom he has been acting as agent. About the 15th of March it was supposed that the matter was finally arranged, but newspaper transcripts that Coleman has filed in equity in the United States circuit court against the Union Packing Company and the White Star Packing company, to prevent them from disposing of the product of their establishments through any other agency than that of W. T. Coleman & Co. It is well known that Coleman has been advancing money to a number of canneries on the Columbia, and have in return been allowed to handle their peck. The canneries above referred to have been satisfied with the manner in which their business has been done, and have concluded to have C. Leinenweber act as their agent. Coleman claims that he had a contract entitling him to the exclusive right of handling the product of these canneries till 1887, and asks for an injunction to prevent any other parties from doing this. He stated that Coleman has been advancing money to the canneries and has worked against the interests of the producers, whereby they have violated the contract.

Regular monthly meeting to-morrow, (Monday, May 6), at 3 p. m., in Y. M. C. A. hall. All our members, of the union, and all ladies friendly to temperance work, are invited to be present.

MRS. W. W. PARKER, Near Bell Street.

Burglars Again.
 Spexarth's gun store was broken into at the left hand show window, about half past one this morning. Officers Corbett and Carlson arrested two men running away from the vicinity who gave names, Edward Allred and Roderick Morris. A repeating rifle was picked up in front of Goodman's shoe store. It was quite dark—the light shone from the store and gun store. A judicious lighting of streets and stores would greatly assist our police in protecting property after the owners have retired for the night.

Drowned in the Surf.
 Word came to the city yesterday of the drowning of two men at Seaside and the probable death of a third. From the best account obtainable it appears that last week a young man named Seaton, Seaton and a man well acquainted with deep-sea fishing, concluded to put into execution the idea advanced by Seaton, who came down from Portland a few weeks ago for the purpose of organizing a deep-sea fishing company. Seaton, with three companions, started from a point below the Seaside hotel yesterday morning. A man who was hunting others and a man well acquainted with deep-sea fishing, concluded to put into execution the idea advanced by Seaton, who came down from Portland a few weeks ago for the purpose of organizing a deep-sea fishing company. Seaton, with three companions, started from a point below the Seaside hotel yesterday morning. A man who was hunting others and a man well acquainted with deep-sea fishing, concluded to put into execution the idea advanced by Seaton, who came down from Portland a few weeks ago for the purpose of organizing a deep-sea fishing company.

AS USUAL.

The house committee on rivers and harbors last Friday concluded consideration of the bill, and will be able to report in a few days. The last appropriations acted on were those for Oregon on Washington territory, and, as stated in these dispatches, these districts did not fare as well as their representatives in congress expected. It was agreed to appropriate as follows: \$10,000 for continuing improvement at Yaquina bay; the engineer's estimate was \$149,000. For constructing the Cascades canal, for which the engineer's estimate was \$500,000, the committee has agreed on an appropriation of \$100,000. The upper Willamette river, above Portland, was allowed \$7500, and the Columbia, below Portland, \$100,000; in the former the estimate was \$31,000, and in the latter \$242,000. For the upper Columbia and Snake rivers, for which the engineers estimated \$26,000, the committee has agreed to appropriate \$5,000. Recommendations for the Coquille river, Coos bay and for improving the mouth of the Columbia were rejected. It was proposed to construct a jetty from the mouth of the Columbia, from the south cape of the entrance to the spit, and there attach it. There were some differences of opinion among the engineers as to the advisability of constructing this breakwater, which would have cost \$500,000, and the disagreement resulted in a minority report by Mendell. However, Wendell, Comstock and Powell agreed that the improvement would be successful, but Mendell reported that owing to the peculiar action of the tides on that part of the coast there were some doubts whether the plan proposed would succeed. The committee concluded that until the engineers reached a settled opinion on the subject it would be unwise to make an appropriation.

He is Wanted in Tennessee.
 About six weeks ago a young man named Madison Canidi, came up here and rented the building corner Benton and Commercial streets, started in the saloon business with a man named Jos. Bottger. Yesterday Canidi was arrested by Mack Twombly on the strength of a telegram from Knoxville, Tennessee, signed by the sheriff and saying that that individual was "wanted." As near as can be made out the charge is that Canidi forged a check for \$2,330 on the First National Bank of Knoxville, Tenn., got the money and came out to Oregon. He is charged to have \$1,500 deposited with I. W. Case, a \$500 interest in the saloon, and awaiting the answer to the last telegram sent, is confined in jail. He claims that the money that he has obtained all square and fair and he is entitled to a suspension of judgment until the true facts in the case transpire. Another version of the affair is that his left hand is worth \$200 and that he told others that he got away with all of it, and that the other heirs are naturally desirous of getting their share. He may be got out to-morrow on a writ of habeas corpus, should Judge McGuire see fit to issue it.

Restored For Sunday Service.
 When the Presbyterian congregation learned last Tuesday morning that their silver communion service had been stolen the night before, it was beyond hope that they would have back the sacred vessels for sanctuary service by the next Sabbath, but, thanks to the chief of police, they have all their purloined goods in place this morning. The communion service was stolen on Monday night. On Tuesday it was proved; that afternoon brought it to Wainman's, went back to the church that night, got rummaging around found some communion wine, surrounded it, got generally fuddled, went to sleep, and was collared by E. C. Holden on Monday morning and taken to jail, where he gave his name as Arthur Moreland and played the part of injured innocence.

The result is that Clark Longhrey has explained the communion service to the church and the gentlemen that exhibit a preference for church pews as sleeping apartments will have an opportunity to explain his connection with the theft of vessels consecrated to the uses of the sanctuary.

Arnold sells Boots and Shoes cheaper than any one else in town, because we buy for cash.

Get a meal at the Model Dining Saloon, three doors south of Old Fellows building, and see how you like the style.

Occidental Council No. 2, of the Order of Chosen Friends, will give the first of a series of socials at Pythian hall Monday, the 6th of May. Refreshments will be served during the evening. Music, singing and probably dancing will be indulged in. The proceeds are to go to the sick benefit fund, and we hope and trust that the public will respond liberally.

Notice.
 Astoria Division, No. 1, Uniform Rank K. of P. will be instituted on Monday, May 6. Members will take notice that each member will be required to exhibit his official receipt for lodge dues at time of institution. The instituting officer is not allowed to receive any member without compliance with this requirement. The hour of institution will be set after the arrival of the instituting officer.

By order J. T. CUTLER, Commander.

Just Received.
 A large stock of soft and stiff Hats in all the latest styles, at McIntosh's Furnishing store.

Stop That Cough
 By going to J. E. Thomas and getting a bottle of Leroy's Cough Balsam. IT WILL CURE YOU.

Musicians Look Here.
 Call and get special catalogue of several thousand pieces of sheet music at Adler's Crystal Palace Book Store. New music received every day from the publishers.

Jeff's Dinner Bill of Fare to-day.
 SOUP.
 OK Tail.
 FISH.
 Boiled Salmon, Egg Sauce.
 BOTTLED.
 Corned Beef and cabbage, Mutton, Capers Sauce, and Ham.
 ROAST.
 Beef, Mutton, Pork, Stuffed Veal, Heart, Lamb.
 EXTRAS.
 Tongue, Oyster Sauce, Lamb Chops, Breaded Spanish, Beef à la mode, Oyster Patties, Veal.

RELISHES.
 Cheese, etc. etc.
 VEGETABLES.
 Mashed Potatoes, Fried Turnips, String Beans.
 PUDDING.
 Plum, Brandv Apple.
 PIES.
 Rhubarb Apple.
 Tea, Coffee, Milk.
 Dinner from 4:30 to 8 p. m. Best Cooks and Waiters.

THE LAST MAN.

Floating on the Atlantic in Company With a Corpse.

A FEARFUL TALE OF THE SEA.

A small iron, full-rigged ship was in latitude 10 degrees north of the equator, outward bound for a New Zealand port. The sun would be setting in an hour; already his disc was rayless and of a dark and angry gold, and his reflection lay in a broad and waving dazzle upon the western swell. A pleasant draught of air, blowing softly over the port quarter, had kept the lighter canvas sleeping all afternoon, but the lower sails hung up and down, and as the ship leaned upon the gentle undulations, the tender swinging of their folds veiled cool currents over the fevered decks, as though some gigantic pumuk-wallah perched aloft, were fanning the ship. The deep blue of the sea, scarcely wrinkled by the breeze, stretched around, and the water-line was like an azure cincture clasped, where the glory of the sun hung, by a plate of gold; but over the side the water was of an exquisite transparent green, in which you could see the metal hull of the vessel waving till a land hid in it, and it was enough to possess a man, half-blinded by the heat that came off the brass rigging under the sun, with a malignant look into the glass-like emerald profound, and to think of the coolness and sweetness to be got by a lazy floating in the serene surface of that fatuous depth. All the afternoon it had been blowing a soft air with now and again a stronger fold that came out of the northeast with a paroling taste in it that might have made it pass for the expiring breath of a rash of atmospheric heat from some hidden bint furnace hidden behind the sea; but one felt that the draughts could not long outlast the sinking of the sun, whose ardency was fast sucking out all life from the air. Already in the south the water-line ruled the deep violet of the sky with a burnished surface, betwixt which and the heavens there was a trembling of heat with the blue beam to a light of four or five degrees. Just where that tremulous appearance was you saw a shining speck, the topmost sail of a ship disconnected by retractions from the rest of the fabric; they looked through the glass like kites flying in the air; and if there was anything in this world to emphasize the vast expanse of the sea, when one came to think how small a handful of miles was needed to sink the big vessel out of sight, to render invisible a hull full of people, partitions, and loaded with a cargo of a value sufficient to render a thousand poor families happy and independent for life ashore. Still the breeze continued blowing steadily from the north-east. There were wrinkles round the stem of the little iron clipper, and the surface of the green clearness over the side was strewn with bubbles that looked like a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars; and whenever the ship tilted to the swell there would come from aloft a sound of strings, or like a million of short awnings to go up, and mark the stunsails spreading further and further as they descended, till the reflection of the great thin squares of cloth stretched by the sailing, shone like a sheet of silver under the black spars;
