About Coughs and Colds.

Coughs and colds are prevalent now, especially among children, too often from the ignorance or careless-ness of their elder guardians. Many Burning Tortures Humil cold is by no means always due to ex-posure. Indigestion, constipation, a lack of scrupulous cleanliness, the unwise habit of sleeping in much of the clothing worn during the day,un-aired bedchambers—all, or any of these things may have far more to do with your child's tendency to cold than the keenest breath of the bracing winter air. And in a great measure these things are under your control. Mothers should understand that this is a fact, whether they can see how it is or not, that numerous sore throats and colds are directly traceable to indigestion and dietetic

error. Quantities of greasy food, fried meats, pastry, and the like, ill-ventilated rooms, and continued constipation, have to answer for many cases of croup and putrid sore throat. All these things weaken the system and render it far less able to resist changes of temperature. Give every bedroom a thorough airing every day, more especially if several chil-dren are obliged to sleep together, or with their parents. This is to be avoided, if possible; if not, always lower the window slightly from the top—or if this cannot be done, raise from below. There is frequently bad air enough generated and breathed in the sleeping apartment of a family with small children to supply them all not only with colds, but with a number of so called "malarious" diseases, to last a year, perhaps longer. Neglect of bathing is an-other prolific source of colds. A child from 2 to 10 years old should certainly receive an entire bath twice a week in winter. A warm bath at night, taking especial care to avoid any chill after, will frequently break up a sudden cold. Keep children from playing in chilly, unused rooms in autumn and winter weather. Let them play out of doors as much as possible, taking care to have their feet warm and dry. A flannel suit and rubber overshoes will frequently save much cough medicine and doc-tor's bills. Keep them warmly clad, but do not be content with thick coats and worsted hoods, while short

Delegates in a Foot-Race.

skirts barely cover the knees-leaving

At the recent primary election in the little town of State Center, which represents the geographical if not the political hub of Iowa, four Blaine men were elected; but for the fifth, a tie be tween a Blaine and an Arthur man was announced. The aspirant repre senting the former was a young mer-chant. He who espoused the cause of the latter is no less a personage than the mayor of the village. once the query arose, how should the matter be decided, and a solution to the problem was quickly arrived at by the younger candidate challenging his rival to a foot-race. The challenge was promptly accepted, a track prepared, and the contestants, stripped to the waist, started. For about half the distance Arthur kept well to the front, but then it became evident that time, though she had dealt lightly with the mayor, had not left him un-scathed, and though the race was an even one to the close, Blaine secured a victory. This somewhat novel, but entirely satisfactory method of decid-ing a tie has its advantages, in the fact that it has afforded much amusement to the inhabitants, and broken in on the hum-drum monotony of village life. The Blaine men, of course, are particularly jubilant, small as the victory is, and assert their conviction that this little episode represents the condition of things that will prevail at the grand finale next June.—Chicago Jules Ocean cago Inter-Ocean.

No matter of how long standing, St. Jacobs Oil is the sovereign-cure for bodily ailments.
