July 29, 1884.

Half a mile from Buzzard Roost, North Carolina, way up among the mountains, is a mine. The owners don't say much about it, nor do they appear anxious for visitors to go there; nevertheless the mine is one of the most curious affairs in the country the most curious analysis the toped, in the world. The material mined here is a peculiar kind of white rock which the miners say has no name, so they have very appropriately called it "deception rock." Its uses are varied and its value is so

barrel.

The uses to which this powdered rock is put are many. The coarser quality, especially that which con-tains small portions of mica, is used Charles Fayre Hinkle, Jersey City Heights, N. J., writes: "My son, a had of twelve years was completely chired of a terrible case of Eczema by the Curretina Remembers. From the top of his lead to the soles of his feet was one mass of scabe," Every other remedy and physicians had been tried in vain.

It also gives sugar of detection. It also gives sugar edy and physicians had been tried in vain. to adulterate granulated sugar. It is mixed with pure sugar without fear of detection. It also gives sugar great weight and for this reason is valuable for purposes of adulteration. The second grade of the "decep-tion rock" powder is much smoother and finer; this is used to adulterate skin of inherited impurities and expelling the germs of scredula, theometism, consumption and severe skin elseases,

weight. Still another and finer grade of the powder is made, and this is used exclusively in the manufacture of candies. Since the introduction of this powder about two years ago it has largely superseded "terra alba", which was formerly used in the manufacture of candies especially in those brands known as the "cheap French mixed."

I asked one of the operators of the mine—an intelligent colored franwhy the candy manufacturers used "deception rock powder" in preference to the "terra alba." "Well, sah," he replied; "I reckon it's jest cause you can detect terra alba, which is a kind of clay, an' you can't detect dis yere powder so easy. Ef yo' dissolve the best made candy in water very slowly, you will find either terra alba or dis yere powder in it.

MESSTS. SEABURY & JOHNSON, Gentlemen; - Like most of my profession, am cautious about pinning my faith to any new medicine or curntive agent. But your BENSON'S CAPCINE POROUS PLASTER has broken through the barriers and won its CHRCUIT COURT, CLATSOP COUNTY way to my good opinion. My attention was first called to it some eight months ago by a patient of mine Although I was well acquainted with the superior excellence of your other plaster and antiseptic dressing, made especially for the profession, the Benson's Consequence of Astoria, Clatsop County. was comparatively new to me. I had heard, however, of its merits as a remedy, in cases of Lame Back, Local Rheumatism, Neuralgia. Congestion of the Bronehial Tubes and Lungs, Dyspepsia, Torpid Liver and the like affections, and have since began to experiment with it personally. I find BENSON'S CAPCINE PLASTER an exceptionally clean-

ly plaster to use, and rapid in its action-Many tests of its qualities, made in my own family and among my patients have convinced me that there is no single article so valuable for popular use, nor so helpful in the diseases I have named. Should you desire to do so, you may use my

name to that effect. Very truly yours. H. H. KANE, A. M., M. D. The genuine have the word CAPCINE cut

in the center. Price 25 cents. Seabury & Johnson, Chemists, New York.
