I will show you the method of mes merizing which is, perhaps, on the whole, most effective: it is very nearly that described by Braid. With one hand a bright object, such as a faceted piece of glass, is held eight to twelve inches. twelve inches from the subject, so that there is a considerable convergence of the eyes, and rather above the level of the eyes, so that he is obliged to look upward. The subject is told to look steadily at the piece of class and to the bis or the piece of class and to the piece of class and the piece of c glass, and to keep his whole attention fixed upon it. This position is kept for five to ten minutes; during this time the pupils will probably dilate considerably, often assuming a slight rhythmic contraction and dilation; when this is the case the free hand is moved slowly from the object toward the eyes. If the subject is sensitive the eyes will receive a subject toward the eyes. the eyes will usually close with a vi-bratory motion. In some cases the subject is then unable to open them, and the usual mesmeric phenomena can be obtained. If, when the operator bring his hand near the eyes of the subject, instead of closing them follows the movements of the fingers, the whole proceeding is re-peated, but the subject is told to close his eyes when the fingers are brought near them, but to keep them fixed in the same direction as before, and to continue to think of the object and that only. The operator then, for some minutes makes "passes," bringing his warm hands over and close to the face of the subject in one direc-tion. When the subject is inclined to pass into the cataleptic state, and in-dication of his condition may be ob-tained by gently raising his arm; if he is beginning to be mesmerized, the arm remains in the position in which it is placed. If the arm falls the mesmeric state, may not infrethe mesmeric state may not infre-quently be hastened by telling the subject to keep his arm extended while he is still gazing at the object, or while the passes are being made. And this is the whole of the process. The man thus mesmerized sinks from manhood to a highly complicated piece of machinery. He is a machine which for a time is conscious, and in which ideas can be excited by appropriate stimulation; any one acquainted with the machinery can set it in ed with the machinery can set it in action.—Popular Science Monthly for October.

His Success

Financially and socially are largely due to his excellent health. If his system were clogged and feverish, no doubt he would fail as so many others do. But why not enjoy good health when one can please the palate at the same time? Svrup of Figs is not only pleasant to the taste, it also cleanses the system thoroughly, yet painlessly; it is harmless in its nature, and strengthens the organs on which it acts so that regular habits may be formed, and the sufferer permanently restored to health and happiness. FRAZIER MEDICINE CO., Proprieother plaster and antiseptic dressing, made way to my good opinion. My attention was especially for the profession, the Benson was ecomparatively new to me. I had heard nowever, of its merits as a remedy, in case of Lame Back, Local Rheumatism, Neural gia. Congestion of the Bronchial Tubes and Lungs, Dyspepsia, Torpid Liver and the like affections, and have since begun to experiment with it personally. I find BENSON'S CAPCINE PLASTER an exceptionally cleanly plaster to use, and rapid in its action-Many tests of its qualities, made in my own

family and among my patients have convinc-ed me that there is no single article so valuable for popular use, nor so helpful in the diseases I have named. Should you desire to do so, you may use my

name to that effect. Very truly yours, H. H. KANE, A. M., M. D. The genuine have the word CAPCINE cut in the center. Price 25 cents.
