W. HAMPTON SMITH.

FORT CLATSOP, Feb. 3, 1885. Editor Oregonion:

one's spirits mount to the third heav-Clatsop county, and especially that part of it within a radius of twenty miles of Astoria, presents many phythings are in store for the land of iological and meteorological features peninsulas. of rare interest. Topographically it is a land of peninsulas. Beginning with the shore of the Pacific ocean at Tillamook head and extending north-

ward to Point Adams, we have the A Father Tries to Fix The Responsibility western boundary of a peninsula, whose eastern limit is the Lewis and Clarke river, which heads in Saddle Clarke river, which heads in Saddle monntain, a peninsula of about three miles in width and twenty miles in length, and ranging all the way from the level to perhaps 500 feet in height.

the level to perhaps 500 feet in height. Bordering the Pacific there is a plain of one mile in width, composed of the bare pacific there is a plain territory, and although the authori-teritory and although the suthorilow sand dunes, and mostly covered trace of the thief could be found. with a thick growth of rich grass. The manner of robbing the registered The hills are composed of indurated The hills are composed of indurated clay of lacustrine origin, and are clothed with a dense growth of hem. clothed with a dense growth of hemlocks and spruce, with some cedar and mostly of young hemlocks, huckle-berry, salad, salmonberry, thimble-chart of Collex sont \$70 to a merfir. The undergrowth is composed

berry, ferns, etc., which, in connection with the down timber, form a jungle the letter reached its destination it ASTORIA, OR

prepared by an axman. This under-growth is green at all seasons of the year, but few of the shrubs dropping growth is green at all seasons of the year, but few of the shrubs dropping themselves in the fall. The ferns sometimes reach from four to six feet in height, and the ground is carpeted with a mat of moss of great variety and beauty. To the lovers of jungles this forest of roft foliage and ferns this forest of soft foliage and ferns son one would suspect of doing a beauty and interest, especially when the bushes are laden with red, blue and black fruit of different kinds and the golden sun light lies around in patches over the soft moss that every. patches over the soft moss that everypatches over the soft moss that every where abounds. One would not real-ly look in such a place for a great profusion of animal life, but such is not the case. On the contrary, vege-table life seems to have proven the ensure that anything is table life seems to have proven the "fittest," as it is rare that anything is seem, among the higher types of life other than the small brown or striped squirrel. Occasionally a black bear is hear to crash among the logs and brush. A few small birds fit here and there almost noiselessly among and there, almost noiselessly among the brush and trees. A few have a sweet song not unlike the canary. One specimen that stays among the thefts had been committed in his office tops of the tall trees in summer sends but stated that his daughter was

tops of the tall trees in summer sends forth a beautiful shrill note, that may be heard for a long distance. I have never seen it. Those who claim to have seen it say that it is the gor-rulus cristatus, or blue jay. This I am inclined to doubt, for how could so sweet a tone come from such a source? Larce snails and froms so sweet a tone come from such a solution that she perhaps was abound, and insect life is abundled to the father's direction. This the father's direction is any Part of the City. dant, especially the flea and gnat. the girl was individually responsible Glass and Plated Ware, TROPICAL AND DOMESTIC Young's river is a similar peninsula to the one just described, except the seashore of about three miles in width and some fifteen miles in length, terminating at Young's bay, and between the Columbia river and Young's river and Young's bay is another peninsuta, terminating at Smith's point. On this Astoria, "tne two named. These peninsular ridges, composed mostly of indurated clay, were formed in ages past when a vast lake, 700 or 800 feet deep, occupied this region. The rivers flowing into it dropped their sediment on either side of the current produced by the rivers flowing into the still waters of the block of the current in the still waters of the lake, and thereby gradually built them up in their present form, modi-fied, of course, by the lapse of time. Standing on the high hills back of Astoria of a bright clear day it is seldom one sees a more pleasing land-scape and waterscape than is present-ed in every direction—the dark rivers, the bays, the ocean, with its commerce-all in one picture. The climate of this region is eccentric alarm. are hidden in fogs and bitten by frosts, here the soft Chinook blows, the sun shines, the grass grows, the air is spicy and full of health and life. And yet it is not always a par-Oil, wit OREGON

But one is impressed as he traverses these dark, trackless forests, with their whatever to do with it, and that if Home-Made Candy Made Daily strange death like silence, with the want of the balancing of the forces of life. It is said that elk and deer in would testify against and help conwant of the balancing of the forces of want of the balancing of the forces of life. It is said that elk and deer in former times were very abundant in these forests, but the rapacity of man has slain them and driven them to more secluded places. The hills are steep and precipitous, two canyons sometimes terminating abruptly on opposite sides of a ridge, not over six hundred feet through, and per-taking all the money to help shield him. As the father and daughter are both in different portions of the jail the ridge to the bed of the canyon, and are not aware of the fact that either one has confessed, it only adds ciers during the ice age had evident-ly done their work, owing to the thorough protection of the surface of the ground by the dense growth of vegetation. Erosion is almost en-tirely suspended at the present time. Between the Lewis and Clarke and Vonno's river is a similar peninsula the girl on the ground that she was not responsible, and send the father up for life, not only on account of the theft, but because of his perfidy. Sunday Mercury. Out of a Swamp. That is where the influence comes from which gives people in the country malaria, fever and horrible future emporium of the northwest," is situated.
