THE TELEPHONE'S TRIP.

The news that Capt. Scott's swift steamer, the Telephone, would make a through run from Portland without stopping, attracted a large crowd to the docks yesterday morning. She blew her whistle at sixteen minutes past eleven. A passenger says: "We left Ash street dock at five minutes past six. To St. Johns she did well, but at that point the steam ran down to 105 pounds, and she was cut off with half stroke; the remainder of the way she was on three-quarter stroke. The low water interfered considerably with her speed. Now and then, when in shoal water, we could feel her just settle down, and slow up as though a brake had been put on, as the wheel smoked, and it is my belief that if the river was eight or ten feet higher she would have improved her time at least half an hour. The running down of the steam at 6:25, alone, detained her fourteen minutes."

"One of her best runs was from Oak Point, which was reached at 9:57; at Cathlamet we met a strong head wind which made white caps on the water, but the tide was in her favor nearly all the way down."

The distance run by the Telephone on yesterday's down trip was 105 miles; time five hours and eleven minutes. Captain Scott is reported to have said, "I would bet his boat against \$10,000 that with plenty of water he would leave Portland at 6 o'clock and blow his whistle in front of Astoria at 10."

The Telephone was heartily cheered on her arrival. She brought a number of excursionists, and at two o'clock started with a big crowd aboard. As she swung out, the engineer "opened her out," and she shot up toward Tongue point on a flood tide with the wind at her back, at such a gait as kept up would land her at Portland at 7:30. A dispatch received last evening says she made the run in five hours and forty-two minutes. She will be down this afternoon, and will start for Portland at six o'clock to-morrow morning.

PROGRAMME OF THE TOURNAMENT.

At the meeting of the executive committee at their rooms last evening the following was adopted as the programme of the fourth annual tournament of the Oregon state firemen's association to be held in this city next June. The programme will be officially approved by the board of directors who will meet at the Gilman house in Portland next Tuesday.

PROGRAMME.

Hose race dry test 300 yards to hydrant, lay 300 feet of hose, screw on pipe, time to be taken when nozzle touches ground. Hook and ladder race; truck to run 600 feet, get man on top of 35 foot ladder. Tender race, any tender team, members not over 16 years, 200 yards. Make and break couplings in 350 feet line hose. Steamer race—Steamers with team of forty-five men, run 100 yards; hose carts run 300 yards to steamer, lay 100 feet hose, get water. Hose race—200 yards to hydrant, lay 300 feet hose, break out seventh and third length, change third and seventh length; get water. Sweepstakes, 300 yards. Sweepstakes, 100 yards—Open to any member of any company in Oregon state firemen's association.

Body Found.

The macerated body of Robert P. Wilson, a ship carpenter, was found between the piling of Greenwick dock and the British bark Beulah, at 4 o'clock yesterday afternoon. Coroner Cook was notified, and the remains were conveyed to the morgue. Wilson came here on the British bark Emberton, which arrived in port in distress a few months ago, and it is thought that he fell overboard and was drowned while attempting to board the vessel after dark. Nothing was found on Wilson's person to identify him other than the initials "R. P. W." tattooed on his right arm, and a crucifix on the left just above the elbow. The coroner's jury found that the deceased came to his death on or about January 20, 1885, by accidental drowning. Wilson was an Englishman by birth, and has a wife living in Liverpool.—News, 4.

The Standard company, under the leadership of the plain comedian, Charley Reed, are making direct advances into the affections of the public.—Call.

Charley Reed's minstrels require no "booming"; their work speaks for itself, and that it is appreciated is evidenced by the large and enthusiastic audience present every evening.—Argus.

Charley Reed, as a funny fellow, bears but little resemblance to the average minstrel person. The humor of Bones or Tambourine is of a stereotyped kind, and we laugh at it more out of habit than anything else. Not so with Charley Reed's comedies. He discards the usual budget and seeks to amuse by original methods. His jokes are of timely point and of current meaning. His manner is quaint and simple, and as laughable in itself as the nonsense he utters. He is genuinely funny. "The Private Sack-Carry" is decidedly uproarious in its fun.—News-Letter.

The tournament will take place in Astoria in June, and will probably be gotten up on the grandest scale of any yet held here. The Albany boys are getting enthused, and are becoming ambitious to atone for their ill luck last year, and, as well, many are anxious to visit the "city by the sea" and see again some of the generous-hearted firemen who visited our city last year. Preparations are being made to hold entertainments, probably a basket picnic and a dramatic entertainment within a short time, for the purpose of raising funds enough to ensure a large number of our firemen going to the tournament. It is now proposed to take two hose teams and a hook and ladder team, thus enabling the firemen to enter nearly every contest. No finer opportunity will ever be offered to Albany firemen to take a first-class summer excursion.—Albany Democrat.

OVER THE WIRES.

General Grant still lives. In the Sudan General Graham has burned Tamai and returned to his former position.

Five persons have been arrested at Madrid for complicity in an alleged plot to assassinate King Alfonso.

The Canadian government has ordered 10,000 Martini-Henry rifles and 8,000,000 rounds of cartridge, for troops.

The Victoria militia have received telegraphic advice to hold themselves in readiness for service in the northwest.

Paris papers assert that, despite the recent victories of the Chinese troops, the government at Peking has decided to accept Ferry's peace proposals.

The amount appropriated for the public land surveys this year is only \$300,000, and the deputy land surveyors throughout the country are disconsolate.

Owing to the critical condition of General Grant the president has postponed indefinitely the general evening reception to the public, which was to have been given Tuesday next.

It is said that President Cleveland tendered ex-President Arthur a diplomatic mission to several European courts, which was declined, as Mr. Arthur proposes to go abroad simply as a private citizen.

The London Post asserts that the rebellion of half breeds in Canada is fomented by Russian agents, with a view of embarrassing dominion authorities and preventing their sending troops to help England.

A difficulty between Morocco and Spain has been adjusted. The batteries at Tangiers have saluted the Spanish flag. The sultan has apologized for attacks made upon Spaniards by Moors along the coast, and has promised to have the governor severely punished.

The United States steamer Dispatch, with between 300 and 400 sailors and marines on board, from Norfolk navy yard, passed Fortress Monroe Friday afternoon. She will intercept the steamer from New York for Aspinwall off Cape Virginia, and the men will there be transferred.

The expenses of the inauguration ceremony were, in round numbers, \$46,500, and the receipts from inauguration ball, tickets, privileges, sales of lumber, etc., were \$46,000, leaving a deficit of only \$500. The committee will, therefore, return nearly the whole of the guarantee fund subscribed by citizens.

It is stated at Berlin and Vienna that negotiations between England and Turkey for an understanding on the Egyptian question has fallen through. England, believing the Afghan crisis to be over, having withdrawn the concessions which she offered when she desired the alliance of Turkey against Russia.

There is no immediate prospect in Washington of the recognition of California by the administration. Secretaries Lamar and Hayard and Postmaster General Vilas, as well as commissioner of internal revenue Blaine, manifest a desire to do something for California, but the president and Secretary Manning still object to touching California appointments.

A Washington dispatch says that McDonald's recent visit to that city was to receive an assurance from the president that there would be a resignation in the cabinet at the end of this year, and that McDonald might have the place if he desired. Upon Mr. McDonald asking what portfolio he was expected to accept he was told the postoffice. McDonald was also told that he might go abroad if he so desired, and represent this government at St. Petersburg. He declined this on the ground that, inasmuch as he would succeed Colonel Vilas within the next nine months, it was better to remain at home and settle up his business affairs. It is stated that Colonel Vilas will leave the postoffice department January 1, 1886, to resume his law practice in Wisconsin, and that he accepted a cabinet portfolio with that understanding.

Is It Not True? There can be no argument as to the qualities arising to a perfect remedy for the ill arising from a disordered or inactive condition of the Liver, Stomach and Bowels. Everyone who admits that it should be perfectly safe for old and young of both sexes, at any and all times; that it should be acceptable both to the taste and the stomach; that it should never fail to act promptly and thoroughly, yet innocuous, and should give strength to those organs. It is now well known that Syrup of Figs possesses those qualities in a pre-eminent degree. W. E. Dement & Co. are agents for Astoria, Oregon.

EASTER EGGS.

A Universal Custom at Easter-Tide.

All over the world, at Easter-tide, eggs are used for games, or given in token of good-will. In our own country, as the time draws near, the boys lay in a stock of eggs, which they boil very hard in a decoction of logwood chips, herbs, or colored rags. When these preparations are finished the fun begins. One boy holds an egg so that the top of it is seen just above his closed fist. Another boy, with his egg held in the same way, pounds with the bottom of it, on the top of egg number one. The egg that is broken first becomes the property of the boy who holds the hardest of the two.

Another egg game that is a greater favorite because it can be played out of doors, is the rolling of these hard-boiled eggs one after another down a hill; and every boy who can break another's property, may have it for his own. In Russia it is a common custom to dye and roll eggs, the latter part of the practice belonging to the children. All classes of the people exchange these pretty little symbols, embracing each other, and exchanging while they do so, "Christ is risen indeed!" In some parts of Scotland the children have the greater share of the fun, and every visitor is invited to take one of these eggs, which he will not refuse, unless he wishes to give offense to his host and hostess. The merry-makers of Naples present each other with stained eggs, arranged in baskets or on trays; the well-to-do classes, taking care that such eggs come from the confectioner or the toy-shop. In Germany, though the egg-giving custom is very popular, they have in many parts of the country Easter hares, hens, and lambs—little sugar things lying on green banks, and many of the people make little nests of moss in out-of-the-way places, and return children are sent to seek "the eggs the hares laid"; such eggs being generally of sugar, or toy eggs that open, in which little presents are hid.

The older people regard the Easter egg as a symbol, the embryo life contained in the egg being emblematical of Christ's rest in the tomb and his glorious resurrection. The children have their version of the custom, too, and say that as the blessed Jesus slept in the sepulchre, a little bird came and sang near the sacred spot; and as a reward for its tenderness, its eggs were always afterward tinted like the colors of the rainbow.

Among the Germans and Russians and Irish this custom is especially prevalent; and beside the playful contests already mentioned, the eggs are concealed in hedges and hay-stacks, and all manner of nooks and crannies, that the excitement and frolic of looking for them may precede the pleasure of finding them.

Easter eggs are sometimes made of glass, of porcelain, of china, of silver or gold, and of all sizes from little to great, and can be made to contain very valuable presents.

Many a lover who was too shy to offer a ring to his pretty neighbor has had courage to confide it to the safe keeping of an Easter egg.

Three fishermen sailing up from the bar at noon, Hungry and dry from their toll of night, They said "Oh, if we were by the Telephone saloon, We could get lunch and a drink and be all right. For men will drink and men will eat—You can do both at the Telephone and that's a treat—And breakfast at the Chop House in the morning."

Three grangers came into the town one day; They came by the way of Necanicum creek To the Chop House to dine we'll go, says they. The best dinner there every day in the week.
