$200,000!

SAVED

BY THE CASH SYSTEM.

J. H. ROBBINS & SON

Have determined to abolish the

OLD CREDIT SYSTEM

And have made

SWEEPING REDUCTIONS!

In Musical Instruments, Sheet Music, Music Books, Strings, and everything pertaining to the music trade. We have called in all our traveling men, discontinued our sub agencies, stopped selling to the trade, and now offer to sell direct to the consumer at a less price than we have been selling to the trade. We propose to sell for cash with order, thereby avoiding bad debts.

Every Piano and Organ sold by us is fully warranted for five years, and will be kept in repair free of charge.

Any Piano or Organ ordered of us, after three days' trial, can be returned at our expense, if not as recommended and satisfactory, and money refunded. You can buy a Piano or Organ of us on the installment plan at the same price as the cash purchaser. By paying us any amount at any time, we place the same to your credit and send you a certificate of deposit. When you have deposited the full cash price of the Instrument you wish, it will be subject to your order.

Should sickness or other misfortune overtake you before the amount of the Instrument is deposited, and should you so desire, your money will be refunded in full. We buy Pianos and Organs at the factory for cash and ship in carloads. Other Musical Goods we buy in Europe, and get them as low as the lowest.

Now, as we offer to sell direct to the consumer, you will get your goods at a heavy reduction by ordering from us.

The cry of Shoddy will be set up by interested parties, but it will not go, for these are the same Pianos and Organs we have been selling for the past ten years: and it is a well known fact that there are no better instruments made in the world.

We append our Price List, in which are shown our old credit prices and our present tremendous reductions. We give prices of leading styles only, but the same reductions run through all styles.

A Rubber Cover and Stool goes with each Piano; a Stool and Music Book with each Organ. No charge for packing and shipping.

Other musical goods reduced in the same proportion as Pianos and Organs. Sheet Music at one-half the list price.

Those who use stringed instruments will save one-half by purchasing strings of us by the bundle.

All we ask is a trial and you will be convinced that we mean just what we say.

Cut this out and save it for future use. Correspondence solicited.

Send for full descriptive catalogue.

WHAT WILL BURST A GUN.

In bravado a young man placed the muzzle of his fowling-piece under the water and fired the charge. The result was the bursting of the barrel near the breech, and the mutilation of his hand. Another placed and held the muzzle of his gun against a piece of plate window glass and fired the charge—powder and bullet. The glass was shattered, so was the gun-barrel. Another instance was that of an experimenter who had heard that a candle could be fired from the barrel of a gun through an inch board. He drove a candle into the muzzle of a gun, fired, and the explosion split the barrel almost its entire length, and did not even drive the candle from the muzzle. Still another burst of a gun-barrel was caused by the use of wet grass as a wad, well rammed down over a charge of shot. But perhaps one of the most singular exhibitions in this line was a Colt's navy revolver, which some years ago was sent to the factory in Hartford, Conn. This was before the adaptation of these pistols to the metallic cartridges, and it is probable that in loading with open powder and ball only a small amount of powder got into the chambers, and the bullet was not propelled with sufficient force to drive it from the muzzle; at least the bullet did not go out, but lodged. As the shooter did not know whether the bullet escaped or not, but kept on firing until the barrel burst or bulged, and when it was sawed in two longitudinally there were found 14 bullets wedged one into the other, and so much "upset" by the hammering of the successive explosions of the powder charges that some of them were not less than one inch in diameter, flattened disks instead of conical bullets.—*Manufacturer and Builder.*

Several new machines will be tested this summer on the beach sands at Yaquina bay and other points where it is well known that fine gold dust abounds in the heavy sand. A number of machines for separating the gold and sand have been invented, but none have yet proved a perfect success. When such a machine is constructed the "golden sands of the Pacific" will be something more than a name. At Coos bay a simple machine, whose cost of construction is only $25, is reported to be taking $23 per ton from sand that by former methods yielded only $1.50 per ton. Its essential features are a copper cylinder containing quicksilver and chemicals. The sand is passed through this, the chemicals serving to remove rust from the gold and render it susceptible to amalgamation with the quicksilver. The machine is not patented, but the owners will not disclose the nature of the cleaning compound used.

The latest addition to frontier railroad towns is Farwell, B. C. It lies on the Columbia river at the point where that stream is to be crossed by the Canadian Pacific. It already has a permanent population of some three hundred, chiefly from the east, among whom are many ladies of refinement. As is usually the case, the rowdy element is quite prominent, but the friends of law and order are sufficiently strong to keep it under control. Improvement in this respect will be rapid as the town becomes older. The steamer *Kootenai* makes semi-weekly trips from Farwell to Little Dallas, W. T., taken in all the supplies used by the town and the railroad, amounting to 400 tons per week. A substantial bridge is being constructed across the Columbia river at this point.
