The cry of Shedidy will be set up by interested parties, but it will not go, for these are the same Planes and Organis we have been selling for the past ten years; and it is a well known fact that here are no better instruments not e in and go out to make calls; and who pass their evenings waiting for some body to come in and break up the monotony. Arabella Stuart never was imprisoned in so dark a dangeor as that.

It may be with hand, it may be with brain, it may be with foot; but work she must or be wretched for-ever. The little girls of our families must be started with that iden. The curse of our American society is that our young women are taught that the first thing in life is to get somebody to take care of them. Instead of that, the first lesson should be, now, under God, they may take care of them-selves. The simple fact is that a majority of them do have to take care of themselves, and that, too, after having, through the false notions of their parents, wasted the years in which they ought to have learned how successfully to na ntain themselves. We now and here declare the inhumanity, eruelty, and outrage of that father and mother who pass their daughters into womanhood, having given them no facility for earning their livlihood.—Rec. T. De Witt Talmage.

The manner of making appropri ations for carrying on river and har-bor improvements are a flagrant disgrace upon our government. As a rule the senators from every state will obtain from the engineers an estimate for executing a certain pub-lic improvement, and the estimates are collected and used as a basis on which the appropriation bill is made up from. When it comes into the hands of the committee, some of the members of which probably don't Cut this out and save it for future use. Income the difference between a saw log and a steam boat, the bill is fought with, cut down one half, and if it passes then it is in big luck. With one half the amount needed to do a certain amount of work, probably just a start could be made, and before any more money could be had the progress would be useless and an other start would have to be made. It is thus with the Columbia river, and with all rivers in Washington and Oregon. On the Columbia just enough money was appropriated to provide necessary tools and appliances to go on with the work. By the time more money is received the first outlay will be thrown away. Talk about an economical govern-ment; bosh! Might as well throw away \$10,000,008 or \$12,000,000 an nually, for the amount of good it does. If enough was expended in this western country to complete a job CHOICE GROCERIES, when a start was once made, it would take but a slight outlay to keep them in repair thereafter.—Chehal is

CONSUMPTION,

which is Scrofulous Disease of the Lungs, is prospelly and certainly arrected and curred by this God-given remedy, if taken before the last stages of the disease are reached. From its vandorful power over this terribly fatal disease, when first offering this now colchated remedy to the public, Da. Pleace thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which from its wenderful combination of tonic, or strengthening alterative, or blood-electrics, antibulious, pectorial, and nutritive properties, is unequalted, not only as a remedy for consumption of the lungs, but for all
