\$200,000! SAVED BY THE CASH SYSTEM.

J. H. ROBBINS & SON. Have determined to abolish the OLD CREDIT SYSTEM. And have made SWEEPING REDUCTIONS!

In Musical Instruments, Sheet Music, Music Books, Strings, and everything pertaining to the music trade. We have called in all our traveling men, discontinued our sub agencies, stopped sending to the trade, and now offer to sell direct to the consumer at a less price than we have been selling to the trade. We propose to sell for cash with order, thereby avoiding cash debts.

Every Piano and Organ sold by us is fully warranted for five years, and will be kept in repair free of charge. Any Piano or Organ ordered of us, after three days' trial, can be returned at our expense, if not as recommended, and satisfactory, and money refunded. You can buy a Piano or Organ of us on the installment plan at the same price as the cash purchaser. By paying us any amount, we will place the same to your credit and send you a certificate of deposit. When you have deposited the full cash price of the instrument you wish, it will be subject to your order.

Should sickness or other misfortune overtake you before the amount of the instrument is deposited, and should you so desire, your money will be refunded in full. We buy Pianos and Organs at the factory for less than the retail price. Other Musical Goods we buy in Europe, and get them as low as the lowest.

Now, as we offer to sell direct to the consumer, you will get your goods at a heavy reduction by ordering from us. The cry of shoddy will be set up by interested parties, but it will not go up there are the same Pianos and Organs we have been selling for the past few years; and it is a well known fact that there are no better instruments made in the world.

We append our Price List, in which are shown our old credit prices and our present tremendous reductions. We give prices of leading styles only, but the same reductions run through all styles.

SALT IN BUTTER.

It is not uncommon says the Coast Mail, to see butter in rolls of good quality and tolerably fresh with a coating of salt crystals all over the outside, giving it a salty and unpleasant appearance. This may be caused in several ways. If the salt used is of poor quality, and particularly if it is too coarse in grain, it fails to be well incorporated in the butter, and, changing to brine after the rolls have been made up, it comes to the surface and takes the form of a crust. The finest and best salt, not well worked into the butter, will act in the same way. Again, if there is more moisture left in the butter than it will naturally hold, the salt joins with this extra water to form brine; this brine finds its way to the outside, evaporates and leaves the salt covering. The best means, therefore, of avoiding this difficulty, is to make the butter by the granular method, wash it very thoroughly and allow it to drain and dry well, while still in the granular form, before adding the salt. Then mix in the salt as thoroughly as possible, having it of the best quality and as fine as can be got; allow it to stand a little while before working and putting into its final form. This gives an opportunity for all the salt to dissolve before the working and then for removing all surplus brine. All butter, however, contains a pretty large percentage of moisture in the form of brine, and it must be kept in a moist atmosphere or else the water of the brine will evaporate more or less, leaving the salt visible on the outside. Any good butter will show this dry salt if exposed long enough in very dry air.

Harvey Ward, a carpenter, sold half his land near Glenwood, Washington county, about two months ago, to a woman in Portland, and received \$500 in cash therefor, and has not been in the county since, and it is feared that he has been foully dealt with. The lady to whom he sold half the property came out to take possession, soon after her purchase, and finding the house locked, did not move in, and has been waiting for him to return and give possession. He had some pigs and a few chickens and other stock on the premises that he did not sell, and it is natural to suppose that he intended to return home.

Caterers have had great difficulty in packing fine fish like salmon and shad to be sent long distances. The packing has been sawdust and ice. The sawdust not infrequently imparts a woody flavor to the fish that spoils it for delicate taste. Thomas Gay, the head waiter at the Fifth avenue, tells me of a new way of packing which is coming into vogue. The fish are simply packed in a rubber bag, and after the packing, and surrounded with sawdust and ice. It is said to answer the purpose admirably. - N. Y. Tribune.

In anticipation of a clean sweep, the postmaster of Golden, Col., has posted up the following notice on the door of his office: "I have got to get out of this shabby abode the 1st of August coming, and I want to close out all of this store truck by that time, and if any of you have the welfare of a fellow being at heart and are fond of a good smoke, walk right up to the counter and drop your shekels—you will never have another such chance."
