How Women May Understand. "Well, you know men understand

### out such things. How often do we hear this sentence from the lips of women, when any question of politics or business is unler discussion, and in how many

different ways and tones it is uttered. Sometimes it is said with an apolo-getic and self-depreciatory manner, as if because men "knew about things" was a good and sufficient reason why women should not; sometimes the air of the speaker is one of discouragement, that seems to say it's really no use to try, under the circumstances; while others still will speak in a grave and serious way, as if they were simply stating a scientific and physiological fact which no one would be unreasonable enough to deny, and concerning which there was no need for any display of feeling whatever.

Women of the last class are per-haps the most "aggravating," for they seem to believe that whatever a man knows about the subjects mentioned above, and other matters re-lating to the conduct of every-day affairs, he knows by intuition or instinct; that it comes to him in some mysterious way because he is a man. It is not perhaps necessary that she should be able to converse fluently about "margins" and "cot-ton futures," although I know several bright women who are all the more attractive and no less womanly be-cause they can at least listen intelli-gently to talk on these multers; and it may not be imperative for her to be prepared to give at a moment's notice an exhaustive opinion upon the advisability of the government's granting subsidies as an encouragement to infant industries in lieu of maintaining a high protective tariff. But she should know how to use a "railway guide" and look after her own baggage in traveling, cash a check at a bank, or send a telegram in a rational manner, and without asking more than fourteen questions of whatever unfortunate man happens to be near. These, and the other every-day matters of which they are types, are fundamental, like the three R's in book knowledge, and a girl or woman ought to be as ashamed of be-

ignorant of the one as the other. But women are to be wives and mothers, you say; they are to be lov-ingly cared for and all burdens and cares of this world outside their homes are to be taken from them by their natural protectors. Well, granted. Suppose each woman in the land matrics and her husband lives longer than she does and is all that a husband should be, so that there are no

old maids, nor widows, nor disappointed wives, who would, of course, have to earn their own living, or at least, manage their own affairs. What then? Women have still no excuse or reason for ignorance. They are to be companions and helpmeets for their husbands, and how many of these latter have hardly a thought or an interest in their lives that is not comprised in the two words "busi-ness" and "polities." If the wives

know nothing of these subjects, what

sort of companions can they be? And

as to the children, will the boy have

less or more respect for his mother and her wishes and authority if she

can sometimes explain what he is so

eagerly desirous of knowing about men and things, instead of giving the

stereotyped reply, "Oh, ask your father, child; I don't know."

But to return to our text of how a

woman may "understand about things"; the answer may be gath-ered from what has already been said.

Let her go to work as a man does, let her read and think for herself and

talk with those who know more of

the subjects to be pursued than her-self. Let her observe and compare,

and, above all, acquire experience by accustoming herself to do things in-

dependently until she has become

self-reliant and has a sound, well-trained judgment that will make her

her own mainstay and a sheet-anchor

of sensible and helpful counsel to all

A dress for the Queen of Italy has just been forwarded to Rome from a

leading Parisian establishment. It

is of satin in a new and delicate shade

of pink, brocaded in white, with a

pattern representing interlaced cords and tassels. The skirt-front was composed of pale pink satin, laid in flat folds just beneath the waist and

caught in graceful draperies at the sides of the train with looped cords of pale pink silk, finished in long, slender tassels in silk and pale pink

beads. This frontage was finished with a fringe to correspond, which

fell over two ruffles of narrow Mechlin

around her.

The Young Surgeon's Story. Again I beheld her-two years of dissipation, of madness, had passed, and once more I saw her whom I had so basely deserted.

ness of her cheek gave her an almost unearthly appearance, I saw that she Goa is very curious. was lovely as ever.

was lovely as ever. All eyes werc upon her-all but mine; for one glance had called up so many painful recollections that I dared not risk a second. I felt my-seif a guilty wretch. "Poor Emily!" I murmured, as tears of bitter remorse filled my eyes. I was interrupted by H-, who, touching my elbow, whispered: "Look in that box on the right. Is it not extraordinary to see a young

it not extraordinary to see a young girl with such white hair?" I turned impatiently from him ; but so many remarks of the same kind were whispered by those near me, that the words seemed to hiss in my

"I'll bet a dozen of champagne," said one of my neighbors, "that she has been frightened. Fear has been know to turn the hair gray in a single night."

"You are mistaken," said another. "No sudden shock could have changed it so completely. I am a surgeon and know something about these things; it is more likely the result of some secret sorrow." "Perhaps she is a widow," said a

her husband ?"? If the look with which I regarded the last speaker could have killed him, **g**there would have been one puppy the less in the world. "Your conjecture does not seem to

be a very probable one," said the surgeon; "she looks too young for a

voluntarily. "Do you know the young lady, sir?" he asked, turning to me. 1 was silent, and he continued. "If the study of physiognomy is to be depended on, an unrequitted passion is

the cause of the calamity." At these words I could no longer restrain my feelings. "Be silent, for heaven's sake!" I exclaimed, grasp-ing his hand convulsively. "I am the greatest villain on the face of the earth !"

He looked at me in astonishment; but just then the curtain again rose, and the clang of music drowned all other sounds. While everybody's other sounds. While everybody's attention was drawn to the perform-ance, I took courage to look once more at Emily. How beautiful she was, as she sat with her gaze fixed on the stage. So young, and already grief had decked her brow with the silvery badge of age! Could it be? Was it she whom I saw? Her golden hair changed to white by grief for my inconstancy [

The play was over-mechanically I rose to go. As I reached the door one my friends hurried to meet me. WYATT "How long have you been re-turned?" said he. "Did you know

that Emily was in town? I saw her

just now. Good heavens! how it has changed her !"

"It has, indeed !" said I with a

The 2d of February in Sweden is considered the midwinter day. In the era of paganism it was a great festival in honor of the heroine Goa or Goja, deified under the name of It was at the opera-she sat in a box near me, and though the paleconsecrated besides. The legend of It states that at one time when the country was visited by a frightful famine, the Thing, or national as-sembly, decided that, in order to al-leviate the general distress, it would

A Swedish Godiva.

be necessary to put to death a part of the population, especially the old and infirm. Goa alone dared to pro-test loudly; and claimed to be able to propose a means of remedying the dearth, which would prove more efficacious as well as more humane. The King ordered the execution of the decree to be postponed; but in the interim, desiring to test the sagacity of the young girl, and to con found her audacity, he sent her word he would only receive her on consti-tion that she would come to his dwelling neither on foot nor on horse back, nor in a vehicle; neither dressed nor undressed; neither in the course of the year nor during any paticular month; neither by day nor by night. Goa solved the enigma. She came

to the King's house on a sledge drawn by a goat, holding on to the side of the sledge, with one leg resting on the pole of the sledge, the other on the goat. She wore a fishing net third, "and has fretted for the loss of only in lieu of garments; and she came exactly at the epoch of the solstice, when the month is still undetermined, at the time of a full moon, but while it was yet twilight Being permitted to speak, she ad vised that the old and infirm, in liewidow. I should say she was not more than seventeen or eighteen." "Just eighteen!" exclaimed I, in-voluntarily to the community. The King liked the advice; and as the adviser had charmed him by her beauty and her wit, he took her for his wife
